

Is ogilvyalbaniaonline.com a scam? TrustSniffer's high-risk assessment: 0/100

ogilvyalbaniaonline.com

Verdict

0

OUT OF 100

CRITICAL RISK

ogilvyalbaniaonline.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

A Chinese-language adult/pirated streaming index site listing videos and brief descriptions. Little verifiable identity or licensing information; appears focused on cataloging and linking to media, likely supported by ads/affiliate links.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

The page as captured

<https://www.ogilvyalbaniainline.com/>

What ogilvyalbaniainline.com served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2018.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is a Chinese-language adult and pirated-streaming index that presents categorized video listings, brief descriptions, and links for online viewing or possible external streaming and download access. Its apparent operating model is advertising, referrals, and traffic aggregation rather than a clearly identified media or licensed-content business.

Scam/Impersonation Risk

Confirmed external contradiction signals are present. The domain is reported as blacklisted by multiple external sources, including two malicious detections and a tier-one security-vendor detection. This is materially more significant than the absence of a conventional login or payment form: the site's catalog of adult and apparently pirated material, unclear destination and monetization mechanics, unverifiable contact or address information, and mismatch between its presentation and substantiated business identity create a high-risk interaction environment. No separate brand-impersonation or conflicting legal-entity finding was identified, but the external detections independently support a strongly cautionary posture. The site's homepage also displays

a contact-channel integrity anomaly in the form of a potentially malformed published address, which could impair deliverability or indicate a typosquatted contact route.

EVIDENCE

- The homepage is labeled and presented as an adult/pirated streaming portal, with Chinese-language listings including “1080P高清完整版播放,” “免费” viewing references, adult categories, and aggregated film and television descriptions.
- External reputation results record `vt\_malicious: 2`, `tier\_1\_threat\_detected: true`, and `external\_blacklist: true`; Google Safe Browsing is recorded as not malicious.
- The homepage contains no login form, sensitive form, hidden form, or observed wallet interaction, but its business-model analysis identifies advertising, referrals, and links to external streaming or download sources.
- Historical technical records identify the domain as first seen on 2018-08-07 and last seen on 2026-04-20, with 18 recorded snapshots across 9 tracked years; no suspicious content repurposing was identified in the reconciled archive assessment.

Regulatory Verification Notes

The site does not provide a clear corporate identity, verifiable licensing information, or a transparent basis for distributing the listed media. Its footer displays a filing-style number, “317090,” and a copyright range of 2020–2024, but the supplied pages do not connect those details to a named legal operator or establish content-rights authorization. This is a disclosure and licensing verification gap rather than, by itself, proof of unlawful conduct; however, in combination with the external blacklist findings and unverified real-world identity, it substantially weakens the site’s regulatory and commercial credibility. The site is not matched in the supplied broker-reputation dataset, which provides no positive or negative broker-specific context.

EVIDENCE

- The homepage footer displays “备案号：317090” and “©copyright 2020-2024,” without a clearly identified corporate entity or licensing authority.
- Domain registration records show registration on 2025-04-18, an age of 1.34 years, registration through DYNADOT LLC, and the registrant organization “Super Privacy Service LTD c/o Dynadot.”
- The site is served from AS13335, CLOUDFLARENET – Cloudflare, Inc., US; its TLS certificate is issued by WE1 with DV validation and is valid to 2026-09-22T19:16:15+00:00.
- The homepage has no structured data, no canonical declaration, and no meta description, limiting the site’s independently verifiable identity and purpose signals.

What to Verify Next

Before any sensitive interaction, the domain should be checked against the relevant national and sectoral security advisories, and any asserted filing or licensing reference should be independently matched to an official registry rather than accepted from the footer alone. Content-rights authorization and the identity of the operating entity should be confirmed through independently sourced records. Official support and contact channels should also be confirmed through an offline or independently published route. Given the malicious and blacklist detections, credentials, downloads, payment details, and other sensitive data should not be submitted through the site.

EVIDENCE

- The supplied assessment records an unverified identity status and no independent identity signals connecting the site to a real-world operator.
- The page-level assessment identifies four red flags: no clear product, opaque value flow, unverifiable contact or address, and claim-evidence dissonance.
- The behavioral analysis observed no login form, sensitive form, hidden form, external POST activity, wallet connection, or clipboard-hijacking behavior during two successful runs; these limited observations do not resolve the external reputation findings.
- The page-authority signal is low, and the domain is not recorded within the stated top global traffic million.

Summary Verdict

The website has a **critical trust posture** and should be treated as unsuitable for sensitive interaction. Its apparent media-index function does not overcome the combination of confirmed external blacklist signals, weak operator attribution, unclear authorization, and limited independent credibility evidence. The available evidence does not verify the real-world identity of the operator.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present and all observed addresses are Cloudflare edge infrastructure; the origin server was not observable in the analysis. This provides a mitigating layer against direct exposure of the hosting environment, but it does not validate the website, its operator, or the safety of its content.

Closing Assessment

Enterprise users should block or isolate the domain and avoid credentials, downloads, payment information, and other sensitive exchanges; any required investigation should be limited to controlled, read-only analysis with appropriate endpoint and network protections.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ogilvyalbaniaonline.com.

- The request stayed on ogilvyalbaniaonline.com. It was not redirected to another domain. CLEAR
- Registration is published under DYNADOT LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-04-18. NOTED
- The earliest public archive of this site is from 2018-08-07. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ogilvyalbaniaonline.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
