

Is okairos.gr legit? TrustSniffer's high-trust assessment: 100/100

okairos.gr

Verdict

100

OUT OF 100

HIGH TRUST

okairos.gr appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 75%.

What this site appears to be

Greek-language weather forecast page covering multiple regions and a 14-day hourly forecast. Contains maps, satellite sections and an extensive cookie/consent explanation indicating many advertising/data vendors.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2003.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a Greek-language weather and forecast portal presenting regional conditions, maps, satellite imagery, and hourly forecasts extending to 14 days, with coverage of approximately 200,000 cities. Its apparent business model is an advertising- and data-consent-supported informational service rather than a transactional or regulated financial platform.

Scam/Impersonation Risk

No contradictions were observed, including no phishing, impersonation, blacklist, or malicious-reputation finding. The site's substantial weather content, established historical continuity, and clean external reputation are consistent with an established informational service. Behavioral inspection recorded one suspicious inline script and significant page changes after interaction; these signals are reasonably attributable to advertising, analytics, and consent-management activity because no login form, hidden sensitive form, external password form, wallet connection, or wallet-drainer behavior was detected. No confirmed scam or impersonation concern is therefore indicated.

EVIDENCE

- The domain has 23.589322381930184 years of registration continuity.
- Web archives record 1,460 snapshots from 2003-01-09 through 2026-08-06, spanning 24 tracked years.
- External reputation checks recorded 0 malicious detections and 0 suspicious detections, with no blacklist or phishing hit.
- The homepage contains weather forecasts, maps, satellite sections, and cookie-consent explanations; behavioral review found no sensitive submission mechanism.

Regulatory Verification Notes

The available content presents the service as an informational weather portal and does not establish an independently verified real-world operator identity. No licensing claim or license number is presented in the supplied page material; for this apparent business model, that is a transparency and verification point rather than evidence of misconduct or a scam. The extensive consent explanation indicates reliance on advertising partners and third-party data providers, making privacy and consent handling more relevant than financial licensing. The overall evidence remains consistent with an established, apparently legitimate website.

EVIDENCE

- The site is served from AS13335, CLOUDFLARENET - Cloudflare, Inc., US.
- The transport certificate is issued by WE1, uses DV validation, and is valid to 2026-11-08T07:18:04+00:00.
- The homepage is categorized as a weather/forecast informational page and contains no sensitive form fields.
- The site's consent material describes advertising and third-party data-provider involvement.

What to Verify Next

Before any credential or payment interaction that may be introduced through a linked or future service, independently confirm the operating entity, applicable terms, and payment protections through an official offline or separately sourced channel. Review the privacy and cookie controls to determine which advertising and analytics permissions are optional and how consent can be withdrawn. Any account, subscription, or commercial functionality should be checked against independently obtained contact and policy information rather than relying solely on on-page claims.

EVIDENCE

- Independent operator identity remains unverified in the available evidence.
- The homepage describes an advertising- and data-consent-supported service rather than a clearly identified merchant or regulated provider.
- The page includes an extensive cookie and consent explanation involving multiple advertising and data vendors.

Summary Verdict

The overall posture is high trust and low risk, with the available evidence consistent with an established, apparently legitimate website. The classification supports ordinary browsing and informational use, while the absence of independent operator verification prevents treating the real-world identity as proven.

Infrastructure Integrity

Cloudflare CDN and WAF protection is present, and all observed addresses were CDN edge endpoints rather than identified origin infrastructure. This provides a meaningful exposure-mitigation layer, but it is a technical protection measure and not proof of operator legitimacy.

EVIDENCE

- Four observed IP addresses were identified as Cloudflare CDN edge endpoints; no origin candidate was identified.

Closing Assessment

Normal informational use is proportionate; before submitting credentials or making any payment, ordinary independent checks of the operator, applicable policies, and payment protections should be completed.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of okairos.gr.

- The request stayed on okairos.gr. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2003-01-09. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about okairos.gr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
