

Is okj.com safe? TrustSniffer's moderate-trust assessment: 60/100

okj.com

Verdict

60
OUT OF 100

MODERATE TRUST

okj.com is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Safe for Read-Only

Assessed 2026-07-31 by automated analysis. Classification confidence 60%.

What this site appears to be

Homepage for OKJ, formerly OKCoinJapan, a Japanese crypto-asset exchange operated by OKCoin Japan K.K. It promotes spot trading, staking, lending, recurring purchases, OTC services, deposits and withdrawals, and account access. The page provides a Japanese regulatory registration number, association membership, legal-policy links, operational notices, and explicit warnings about volatility, cybersecurity, and crypto-related fraud.

Evidence status and limitations

Key findings

- Automated classification: Safe for Read-Only.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2000.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website presents OKJ, formerly OKCoinJapan, as a Japanese custodial crypto-asset exchange operated by OKCoin Japan K.K. Its apparent business model encompasses spot trading and brokerage, staking, crypto-asset lending, recurring purchases, institutional and over-the-counter services, and yen and crypto-asset deposits and withdrawals.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing indicators, malicious reputation findings, or confirmed threat-list matches were observed. The consistent presentation of the OKJ and former OKCoinJapan names, combined with a long-established domain and multi-decade archival record without evidence of suspicious repurposing, supports provenance. The homepage's account-access functions are consistent with the stated exchange model, and observed browser behavior showed no wallet-draining, clipboard-hijacking, cloaking, hidden-form, or suspicious-script activity.

- The homepage identifies the service as “OKJ | Crypto Asset Trading (formerly OKCoinJapan)” and names OKCoin Japan K.K. as its operator.
- The domain was registered in 2000 and is approximately 26.38 years old; registration is maintained through Amazon Registrar, Inc.
- The web archive contains 73 snapshots spanning 2000–2026, covering 27 tracked years, with no confirmed semantic drift or suspicious repurposing.
- External reputation evaluations recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing result, and no reported abuse against the observed hosting address.

Regulatory Verification Notes

The homepage presents a Japanese crypto-asset exchange registration number, industry-association membership, legal-policy links, and explicit warnings concerning volatility, cybersecurity, fraud, and the absence of sovereign guarantees for crypto-assets. These are substantive indicators of a professionally disclosed financial-service operation, although the supplied evidence does not independently validate the displayed registration or membership. Because the service takes custody of customer assets and requires deposits for core financial functions, its principal risk is counterparty, custody, operational, and market exposure rather than an observed impersonation pattern.

- The homepage identifies the operating legal entity and displays a Japanese regulatory registration reference and industry-association membership.

- The homepage links to legal and policy materials and explains that regulatory listing does not constitute a guarantee or recommendation of crypto-asset value.
- The homepage provides specific warnings about price volatility, cybersecurity threats, crypto-related fraud, and the non-fiat nature of crypto-assets.

What to Verify Next

Before transferring material value, the displayed registration should be matched directly to OKCoin Japan K.K. in the relevant Japanese regulator's register, including the authorized domain and permitted activities. The applicable terms should be reviewed for asset segregation, custody arrangements, withdrawal controls, complaint handling, staking and lending counterparty exposure, and insolvency treatment. Official contact channels should be confirmed independently, and any initial funding should follow the institution's established counterparty-onboarding and transaction-limit controls.

- The homepage exposes separate account functions for yen deposits and withdrawals, crypto deposits and withdrawals, bank information, security settings, and transaction history.
- The homepage publishes dated operational notices concerning asset-service suspensions, bank maintenance, withdrawals, and the domain change.
- Interactive testing completed two successful runs without detecting a sensitive form on the homepage, an untrusted form destination, or an external password form.

Summary Verdict

The website has a moderate and cautiously favorable trust posture. Its identity, provenance, professional content, and clean technical behavior converge toward a credible exchange operation, with no contradictory evidence of scam or impersonation; residual uncertainty relates principally to the independent confirmation required for sensitive financial engagement.

Infrastructure Integrity

The site is served through mainstream Amazon cloud hosting with valid domain-validated transport encryption. This provides conventional infrastructure and connection-security safeguards, but such controls mitigate technical exposure rather than independently proving the operator's legitimacy.

- The hosting infrastructure serves the site from AS16509 (AMAZON-02 — Amazon.com, Inc., US).
- The site's TLS certificate was issued by Amazon RSA 2048 M04 with DV validation and is valid until 2026-12-23.

Closing Assessment

Standard browsing and account login are appropriate; high-value transfers or other sensitive financial actions should proceed only after formal counterparty verification and proportionate transaction controls.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status

UNVERIFIED

Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of okj.com.

- The request stayed on okj.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under Amazon Registrar, Inc.. [CLEAR](#)
- DNS for this domain is served by awsdns-19.org, across 4 name servers. [NOTED](#)
- The registration is paid up to 2035-03-19. [CLEAR](#)
- The earliest public archive of this site is from 2000-04-07. [CLEAR](#)
- It is hosted on AMAZON-02, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about okj.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
