

Is ole.tv.br legit? TrustSniffer's high-trust assessment: 100/100

ole.tv.br

Verdict

100

OUT OF 100

HIGH TRUST

ole.tv.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-10 by automated analysis. Classification confidence 70%.

What this site appears to be

Marketing and product pages for OléTV: consumer subscription tiers and B2B white-label/partner offerings. Highlights CDN footprint, DRM certification, device support, pricing, and contact for consultants. Provides company registration and address in footer.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2020.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

OléTV is a Brazilian internet television service that presents consumer subscription offerings alongside a white-label and co-branded television platform for internet service providers and other business partners, with recurring subscription, platform, setup, and revenue-share fees as its apparent business model.

Scam/Impersonation Risk

No blacklist, phishing, malware, impersonation, or conflicting-identity indicators were observed. The site's pages present a coherent streaming and B2B platform proposition, and the behavioral review found no credential-harvesting form, hidden form, wallet connection, clipboard manipulation, cloaking, or suspicious inline script. A set of abuse reports concerns an IP attributed to shared infrastructure associated with Framer B.V.; because the attribution is to shared provider infrastructure rather than specifically to OléTV, it is a soft reputational signal and does not establish site-level abuse. The available evidence is therefore consistent with an established, apparently legitimate website, while the real-world operator remains independently unverified.

EVIDENCE

- The homepage and product content describe OléTV consumer television subscriptions and white-label services for providers, with no listed red-flag content.
- The behavioral review recorded 0 hidden forms, 0 password forms sent to external destinations, 0 wallet-connect runs, 0 wallet-drainer runs, and no cloaking.
- Five abuse reports were recorded against IP 31.43.160.6, attributed to shared infrastructure and identified as "Content Delivery Network" usage associated with Framer B.V.; this is not a site-specific finding.
- The domain was registered on 2018-10-08 and is approximately 7.84 years old; historical records contain 97 snapshots from 2020-08-10 through 2026-06-10, spanning 7 tracked years.

Regulatory Verification Notes

The footer reportedly provides a company registration reference and address, which supports basic commercial disclosure. However, the supplied pages do not present a licensing authority or license number, so any authorization relevant to television content distribution or platform operation requires independent confirmation. This is a transparency and verification matter rather than evidence of a scam. The site's apparent operator

identity is not independently verified, and the available third-party broker context contains no match; neither point changes the high-trust classification.

EVIDENCE

- The homepage footer presents a company registration reference and business address.
- The product pages identify consumer subscriptions, provider-facing platform services, white-label setup fees, and channel revenue sharing, but no licensing authority or license number is shown.
- The site is served from AS16509, AMAZON-02 - Amazon.com, Inc., US; the resolved infrastructure country is NL.
- The transport certificate is issued by YE1 at DV validation level and is valid through 2026-10-30T12:07:28+00:00.

What to Verify Next

Before credential or payment interactions, an enterprise or consumer counterparty should independently confirm the footer's company registration and address through the relevant corporate registry, review the applicable terms and cancellation or refund provisions, and confirm available payment-protection mechanisms. For provider engagements, the proposed revenue-share, content-rights responsibilities, service levels, and white-label implementation terms should be documented directly with the commercial counterparty. Official contact channels should also be confirmed through an independent route before sensitive information is exchanged.

EVIDENCE

- The footer supplies the identity details that should be checked against the relevant corporate registry.
- The commercial pages identify monthly packages, setup charges, and revenue sharing, making the written commercial terms material to any B2B engagement.
- The site presents a "Fale com Consultor" sales route and customer-service functions, providing channels for direct confirmation of the proposed arrangement.

Summary Verdict

The website has a **high-trust, low-risk posture** and the available evidence is consistent with an established, apparently legitimate streaming business. No contradictions were observed. The principal qualification is that the real-world operator identity has not been independently verified.

Infrastructure Integrity

The site is protected by CDN/WAF infrastructure, with observed traffic terminating on edge servers associated with AS16509; this reduces direct exposure of the underlying service infrastructure and is a mitigating security measure, not proof of legitimacy.

Closing Assessment

Normal browsing and ordinary service evaluation are proportionate, while credentials or payments should follow independent confirmation of the merchant identity, contractual terms, and available payment protections.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 5 reports on hosting IP 31.43.160.6 (Framer B.V., Content Delivery Network), 9% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ole.tv.br.

- The request stayed on ole.tv.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by net.br, across 2 name servers. NOTED
- The registration is paid up to 2026-10-08. NOTED
- The earliest public archive of this site is from 2020-08-10. CLEAR
- It is hosted on AMAZON-02, from a server in NL. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ole.tv.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
