

Is olgon.net a scam? TrustSniffer's high-risk assessment: 0/100

olgon.net

Verdict

0

OUT OF 100

CRITICAL RISK

olgon.net shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 75%.

What this site appears to be

An early-stage landing page for 'olgon.net' advertising an AI website builder with free credits and an email signup for updates. Minimal content; no payments or login forms present.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	14 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	26% confidence AbuseIPDB, 13 reports; shared hosting inflates reports	CLEAR
Domain age	8.8 years old Registered history	CLEAR
Web archive	Archived since 2018 690 snapshots	CLEAR
Certificate	Encrypted connection Issued by GoDaddy TLS Intermediate CA DV - R1v1	NOTED

The page as captured

<https://olgon.net/>

What olgon.net served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2018.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Olgon.net is an early-stage “Launching Soon” landing page for an AI website-building service called Airo AI Builder. It presents a promise to take visitors “from idea to live site in minutes,” offers 50 free credits, and provides an email signup for updates, promotions, and future service availability; the apparent business model is a freemium SaaS offering.

Scam/Impersonation Risk

Material contradictions were observed despite the limited-risk appearance of the homepage. External security intelligence identified the domain through a confirmed blacklist and multiple malicious detections, creating a significant risk for sensitive interaction. The available page signals do not establish a login, payment mechanism, phishing form, wallet function, brand impersonation, or conflicting legal identity, and the abuse reports associated with the hosting IP are attributed to shared provider infrastructure rather than conclusively to this website. These attribution limits reduce precision about the underlying cause but do not offset the confirmed

domain-level warnings. The domain's established registration and substantial archive continuity are positive provenance indicators, yet they do not neutralize the current threat detections.

EVIDENCE

- External security checks recorded 14 malicious and 1 suspicious detections for the domain, with a confirmed blacklist result.
- The hosting IP 76.223.105.230 has 13 abuse reports; the reports are attributed to shared Amazon provider infrastructure.
- Domain registration began on 2017-11-03, making the domain approximately 8.8 years old.
- The web archive contains 690 snapshots spanning 2018–2026, with 9 years tracked.

Regulatory Verification Notes

The homepage presents a software-service concept rather than a regulated financial offering, but it does not identify a legal operating entity or provide a licensing or registration disclosure. The real-world operator therefore remains unverified, and the site's "Copyright © 2026 olgon.net" notice is not sufficient to establish corporate identity. Registration through GoDaddy.com, LLC and a valid domain-validated certificate are administrative and technical indicators, not proof of the operator's legitimacy. No broker-dataset match was identified; that contextual result is not a legal or licensing determination.

EVIDENCE

- The homepage contains no visible legal-entity name, regulatory number, or licensing disclosure.
- The domain registrar is GoDaddy.com, LLC, with an expiration date of 2027-11-03.
- The TLS certificate is issued by GoDaddy TLS Intermediate CA DV - R1v1, uses DV validation, and is valid to 2026-10-12.

What to Verify Next

Before any sensitive interaction, an independent business-identity check should confirm the operator's legal name, jurisdiction, support channels, and ownership of the advertised Airo AI Builder service. The email-signup destination and any future account or payment workflow should be tested only after confirming that the relevant privacy, terms, refund, and data-processing disclosures are consistent with the identified operator. If the service later introduces regulated financial functionality, licensing should be checked directly with the applicable regulator rather than relying on statements made on the site.

EVIDENCE

- The homepage is a minimal coming-soon presentation with no independently verifiable corporate identity.
- The supplied page contains only an email/contact form and no login or payment form, so future interaction surfaces remain unassessed.
- The site's terms and privacy references should be reviewed for a named contracting entity before data submission.

Summary Verdict

The available evidence supports a **critical trust posture** for sensitive interaction. The site's benign SaaS presentation and established technical history are outweighed by confirmed external threat detections and blacklist status, while operator identity remains unverified.

Infrastructure Integrity

The website is served through Amazon.com, Inc. infrastructure in the United States on AS16509 and is protected by a CDN/WAF configuration. Observed infrastructure includes two CDN edge addresses and one potential origin candidate; these protections may mitigate direct exposure, but they are infrastructure controls rather than evidence that the website itself is legitimate.

Closing Assessment

The appropriate interim posture is passive review only, with credentials, personal information, and payment details withheld until independent identity and security checks produce a satisfactory result.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- The page exchanged network traffic with destinations TrustSniffer does not recognise.

Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC

- The page made background requests to destinations TrustSniffer does not recognise.

Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR

- Most of what the page loaded came from other domains rather than from this one.

Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH

- The page sent data to a destination TrustSniffer does not recognise.

Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS

- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 13 reports on hosting IP 76.223.105.230 (Amazon.com, Inc., Content Delivery Network), 26% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of olgon.net.

- The request stayed on olgon.net. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2027-11-03. CLEAR
- The earliest public archive of this site is from 2018-01-16. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about olgon.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
