

Is omengineers.net a scam? TrustSniffer's high-risk assessment: 0/100

omengineers.net

Verdict

0

OUT OF 100

CRITICAL RISK

omengineers.net shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Website for Om Engineers, a Vadodara-based HVAC company offering AC sales, installation, AMC and related services. Provides contact numbers, showroom and head office addresses, and service descriptions. No investment or credential-harvesting behavior detected.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

What omengineers.net served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2010.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website presents itself as Om Engineers, a Vadodara-based HVAC company offering air-conditioner sales, installation, repairs, annual maintenance contracts, and related commercial services, with visitor journeys focused on product information, service enquiries, and quotation requests.

Scam/Impersonation Risk

A **confirmed external reputation contradiction** materially changes the assessment of this otherwise conventional local-services presentation. Multiple external security detections classified the domain as malicious, and the domain is reported as blacklisted by multiple sources. The site itself does not display a login form, credential-harvesting workflow, investment offer, or other abuse pattern in the reviewed pages, and no on-page brand impersonation or conflicting legal identity was identified; however, those benign content characteristics do not offset the confirmed external detections. The apparent Om Engineers identity is therefore not sufficient grounds for sensitive interaction.

EVIDENCE

- The homepage presents HVAC products, repairs, installations, and maintenance services rather than a financial or credential-collection service.
- The reviewed site behavior recorded no login form, hidden sensitive form, wallet interaction, clipboard activity, or suspicious inline script.
- Domain registration: 2019-01-06; age 7.62 years; registrar Gandi SAS.
- Historical record first seen 2010-12-28 and last seen 2025-07-14, spanning 16 years tracked.

Regulatory Verification Notes

The site's stated business model is ordinary HVAC sales and servicing, but the available material does not establish an independently verified operator identity or regulatory standing. No license claim or license number is presented for independent validation; for this type of local service business, that is a transparency and verification gap rather than standalone evidence of fraud. The site's contact, showroom, head-office, and service descriptions provide an apparent commercial identity, while the external blacklisting and malicious detections remain the controlling risk considerations. No matching broker-reputation record was identified, but that absence is contextual only and is not a regulatory determination.

EVIDENCE

- The homepage identifies "Om Engineers" and describes services for corporate offices, hospitals, educational institutions, malls, cinemas, and other commercial premises.
- The site provides a service helpline, showroom and head-office address information, and a contact/quotation form.
- Hosted on AS31898, ORACLE-BMC-31898 — Oracle Corporation, US.
- TLS certificate: issuer YR2; DV validation; valid to 2026-11-03T23:47:09+00:00.

What to Verify Next

Before any credential submission, payment, or other sensitive interaction, an independent party should confirm that Om Engineers is the operator of the domain by contacting the business through an independently sourced telephone number or physical business channel. Any applicable local business, tax, trade, or service accreditation should be checked directly with the relevant issuing authority, and quotation or payment instructions should be matched against independently confirmed business details. Until those checks are complete, interaction should remain limited to passive review and non-sensitive enquiry.

EVIDENCE

- The homepage contains a single contact/quote form and publishes business contact details that can be cross-checked independently.
- The site's displayed business identity and service locations should be compared with independently obtained commercial records.
- External security detections and blacklist status require resolution through independent security review before sensitive use.

Summary Verdict

The website has a conventional local-business appearance but carries a critical sensitive-interaction risk because credible external detections and blacklist reporting contradict the otherwise benign page presentation. The available evidence does not support treating the site as trustworthy for credentials, payments, or other sensitive activity.

Infrastructure Integrity

The domain resolves through direct hosting rather than a detected CDN or WAF layer, with no edge-IP posture identified. This infrastructure configuration is technically ordinary but provides no compensating protective signal against the external reputation findings.

Closing Assessment

Prospective users should suspend sensitive interaction until the operator, business details, and applicable regulatory or commercial credentials have been independently confirmed; passive review may continue while those checks are performed.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	37%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of omengineers.net.

- The request stayed on omengineers.net. It was not redirected to another domain. CLEAR
- Registration is published under Gandi SAS. CLEAR
- DNS for this domain is served by bluehost.in, across 2 name servers. NOTED
- The registration is paid up to 2027-01-06. NOTED
- The earliest public archive of this site is from 2010-12-28. CLEAR
- It is hosted on ORACLE-BMC-31898, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about omengineers.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
