

Is on-telecom.ru legit? TrustSniffer's high-trust assessment: 93/100

on-telecom.ru

Verdict

93

OUT OF 100

HIGH TRUST

on-telecom.ru appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-02 by automated analysis. Classification confidence 55%.

What this site appears to be

ОНТелеком offers business telecommunications, data-center colocation, connectivity, virtual PBX, and dedicated-server rental services in Russia, with contact information and Ryazan office/data-center addresses.

Evidence status and limitations

Evidence completeness: UNKNOWN

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

ОнТелеком is a Russian B2B telecommunications provider presenting business connectivity, data-center colocation in Ryazan, virtual PBX, Wi-Fi, fiber rental, and dedicated-server services through a corporate service site.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent corporate service model, with no phishing, impersonation, cryptocurrency, investment, deposit, or other abuse indicators. Its contact details, office and data-center references, privacy-consent workflow, and business-service descriptions are consistent with the stated operating model.

- The homepage identifies business telecommunications, data-center, connectivity, virtual PBX, Wi-Fi, and server-rental services.
- The homepage publishes telephone contact details, a business email address, and Ryazan office/data-center references.
- The homepage analysis recorded no red flags, phishing indicators, brand impersonation, or crypto-related signals.
- The domain was registered on 2014-02-13 and is approximately 12.47 years old.

Regulatory Verification Notes

The site provides privacy and agreement pages and describes commercial service delivery rather than regulated financial activity. No licensing or registration number is claimed in the supplied site content; this is a transparency item for ordinary business verification, not an indication of deception. The domain is registered through REGRU-RU, and external reputation checks found no confirmed malicious or blacklist result.

- The homepage links to privacy and agreement pages and includes consent for personal-data processing.
- The domain registrar is REGRU-RU; registration expires on 2027-02-13.
- The site is hosted on AS57724, identified as DDOS-GUARD - DDOS-GUARD LTD, RU.
- The TLS certificate is issued by YR1 at DV validation level and is valid until 2026-09-25.

What to Verify Next

For procurement or higher-value service arrangements, the prospective customer should confirm the provider's applicable telecommunications registrations, contracting entity, service terms, and payment instructions through independently sourced business records and an offline contact route.

- The homepage identifies a "Universal telecommunications operator" service proposition.

- The site provides separate agreement and privacy pages for contractual and data-processing review.
- The homepage offers request forms for business-service enquiries and account access.

Summary Verdict

On balance, the site is a legitimate, established, and trustworthy corporate service website. Its identity, operating model, technical stability, and reputation signals converge without contradictory evidence, supporting normal business interaction.

Infrastructure Integrity

The site resolves to a single likely origin address hosted by DDOS-GUARD - DDOS-GUARD LTD in Russia on AS57724, with no CDN detected. This architecture provides less edge-layer separation than a CDN-backed deployment, but remains a mitigating infrastructure signal rather than evidence of illegitimacy.

- Hosting provider: DDOS-GUARD - DDOS-GUARD LTD, RU.
- Autonomous system: AS57724.
- Infrastructure resolution identified one unique IP and one likely origin IP.
- No CDN was detected.

Closing Assessment

Normal interaction, including account login and standard account actions, is appropriate; formal contracting should follow the organisation’s usual supplier-verification procedures.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of on-telecom.ru.

- The request stayed on on-telecom.ru. It was not redirected to another domain. CLEAR
- Registration is published under REGRU-RU. CLEAR

About this assessment

A trust score summarises the evidence TrustSniffer could collect about on-telecom.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
