

Is ondacero.es legit? TrustSniffer's high-trust assessment: 100/100

ondacero.es

Verdict

100

OUT OF 100

HIGH TRUST

ondacero.es appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-12 by automated analysis. Classification confidence 75%.

WHAT THIS SITE APPEARS TO BE

Established Spanish radio and news site (Onda Cero) presenting headlines, radio program listings, podcasts and regional sections. Standard cookie/privacy notices and advertising partner references; no financial solicitations or credential collection observed.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1996.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Onda Cero is an established Spanish radio and news portal presenting breaking headlines, online radio programming, podcasts, sports, culture, weather, and regional coverage, with an apparent advertising- and partnership-supported media business model.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents ordinary editorial and broadcasting content rather than financial solicitations, cryptocurrency services, or credential-harvesting flows, and no brand impersonation, phishing, or malicious reputation signal was identified. Runtime observations included third-party network activity and substantial page changes after interaction, but these are compatible with advertising, analytics, consent management, and dynamically loaded media content; no hidden forms, wallet activity, clipboard manipulation, or cloaking was observed. The long-running archive record remains aligned with the current news and media category, supporting continuity rather than suspicious repurposing.

EVIDENCE

- The homepage presents news, radio programming, podcasts, and regional sections, with no financial solicitation or credential-collection form observed.
- Browser behavior showed no hidden forms, password-exfiltration forms, wallet connections, wallet-drainer activity, clipboard hijacking, or cloaking.
- Domain registration continuity: registered 1996 (29.63 years old).
- Web archive: 5,000 snapshots spanning 1996–2019, covering 24 years.

Regulatory Verification Notes

The reviewed material is consistent with a media publisher and advertising-supported service, not a site presenting itself as a regulated financial provider. No regulated license claim or license number is presented in the reviewed content; this is a limited disclosure point relevant if separate commercial, subscription, or payment services are offered, but it is not evidence of deception. The real-world operator connection is likely but not independently verified, so the site's apparent legitimacy should not be treated as proof of a specific legal entity. The clean external reputation, established public footprint, valid transport encryption, and identifiable hosting infrastructure support the high-trust assessment.

EVIDENCE

- The homepage title and content identify Onda Cero as an online radio, news, and podcast service.
- Hosted on AS16509, AMAZON-02 – Amazon.com, Inc., US.
- TLS certificate issued by YE2 with DV validation, valid to 2026-10-25.
- The site appears within the established global web-traffic population, with no malicious or suspicious detections reported by the evaluated reputation checks.

What to Verify Next

For any subscription, purchase, or other payment interaction, independently match the responsible operator and applicable consumer terms to an authoritative corporate source. Before submitting credentials or payment details, confirm that the page is reached through the institution's independently sourced official contact or application channel and review the available payment-protection, cancellation, and refund terms. Ordinary editorial use does not require the same level of transaction-specific verification.

EVIDENCE

- Identity check: compare the legal or contact information presented on the site with an independently sourced corporate or publisher record.
- Commercial-use check: review the applicable subscription, cancellation, refund, and payment-protection terms before completing a transaction.
- Channel check: validate official support and contact routes through an independent source rather than relying solely on a page reached through an unsolicited message.

Summary Verdict

The available evidence is consistent with an established, apparently legitimate website with a high-trust and low-risk posture. No scam, impersonation, phishing, or other contradictory signal was observed, although the real-world operator identity remains not independently verified.

Infrastructure Integrity

The website is protected by AWS CDN/WAF infrastructure, and the observed address belongs to a CDN edge rather than exposing a directly identified origin. This provides a meaningful mitigation against routine origin exposure and abuse, while remaining a security control rather than proof of legitimacy.

EVIDENCE

- AWS CDN/WAF protection observed; the origin server was not identified among the observed infrastructure.
- Observed edge address: 63.35.102.120.

Closing Assessment

Normal editorial browsing is proportionate to the assessed posture; before credential or payment interactions, ordinary independent checks of the operator, transaction terms, and payment protections should be completed.

Written analysis generated 2026-08-12 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ondacero.es.

- The request stayed on ondacero.es. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 1996-12-24. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ondacero.es at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
