

Is one-keys.com safe? TrustSniffer's moderate-trust assessment: 65/100

one-keys.com

Verdict

65

OUT OF 100

MODERATE TRUST

one-keys.com is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

One Key is a small ecommerce site selling premium 5ml perfume oils and related accessories, featuring product descriptions, pricing, contact email and policy links. No signs of credential harvesting, crypto transactions, or aggressive investment claims.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Governance Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2021.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

One Key is a small direct-to-consumer ecommerce website presenting premium 5ml perfume oils inspired by Arabic perfumery, together with travel bottles, accessories, product descriptions, prices, cart functionality, and policy links; its apparent business model is one-time retail sales rather than financial services or credential-based activity.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent retail proposition centred on perfume oils, including Oud, Black Oud, and Sava fragrances, and the available page analysis found no credential-harvesting forms, hidden forms, crypto functionality, wallet activity, aggressive investment claims, or suspected brand impersonation. External reputation checks found no confirmed malicious or phishing indication, although coverage was partial; this supports a cautious but not accusatory assessment.

EVIDENCE

- The homepage describes premium, alcohol-free 5ml perfume oils and identifies specific fragrance lines including Oud, Black Oud, and Sava.
- The homepage and shop experience present ordinary ecommerce functions, including product pricing, cart access, and product variants.
- Behavioural inspection recorded no hidden forms, password-external forms, wallet activity, clipboard manipulation, cloaking, or suspicious inline scripts.
- Archive records show 51 snapshots spanning 2021–2026, with no detected suspicious repurposing or semantic drift.

Regulatory Verification Notes

The site appears to operate as a consumer fragrance retailer, so the principal verification issue concerns merchant identity and consumer-commerce disclosures rather than financial licensing. The available evidence does not independently verify the real-world operator, and the site's legal or governance disclosures are unclear; this limits confidence in attributing the storefront to a specific business entity without implying that the site is fraudulent. The absence of investment, trading, or regulated-financial claims materially narrows the regulatory exposure indicated by the pages reviewed. The page also has limited search-oriented and structured metadata, which is a presentation and discoverability weakness rather than evidence of deception.

EVIDENCE

- The homepage and shop pages identify the business as “One Key” and describe direct sales of perfume oils and related accessories.
- The hosting infrastructure is AS47583, operated by AS-HOSTINGER - Hostinger International Limited, CY; the resolved server is located in GB.
- The site's TLS certificate is issued by WR1, uses DV validation, and is valid to 2026-09-21T11:31:38+00:00.
- The homepage has no detected JSON-LD structured data and no populated meta description.

What to Verify Next

Before a high-value purchase or provision of sensitive information, the prospective customer should confirm the seller's legal trading name, returns process, delivery terms, and applicable consumer protections from the site's policy pages. Payment should be made through a method offering transaction dispute or purchase protection, and the official support and contact channels should be confirmed independently of the storefront. Any material discrepancy between the checkout entity, payment descriptor, and stated merchant identity should be resolved before completion.

EVIDENCE

- The homepage contains an “About Us” presentation but does not independently establish a verified legal operator.
- The site exposes shipping and privacy policy topics, making those pages the appropriate location for checking transaction and data-handling terms.
- The shop uses standard cart and checkout flows for one-time product purchases rather than account-based financial interaction.

Summary Verdict

The website has a **moderate-trust posture**: its retail purpose and observed behaviour are consistent with a conventional small ecommerce storefront, and no scam, phishing, or impersonation contradiction was identified. Confidence remains qualified because the operating entity is not independently verified and the available disclosure picture is incomplete.

Infrastructure Integrity

The site resolves to a single likely origin address, with no CDN detected and no edge-IP layer identified. This provides a straightforward hosting path but fewer distribution and shielding layers than a site using a mainstream CDN/WAF; infrastructure therefore offers limited mitigation and should not be treated as proof of legitimacy.

Closing Assessment

Ordinary browsing and low-value consumer use appear proportionate, while independent merchant and payment-protection checks should precede high-value purchases or sensitive disclosures.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by registration and ownership.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of one-keys.com.

- The request stayed on one-keys.com. It was not redirected to another domain. CLEAR
- Registration is published under HOSTINGER operations, UAB. CLEAR
- DNS for this domain is served by dns-parking.com, across 2 name servers. NOTED
- The registration is paid up to 2028-03-03. CLEAR
- The earliest public archive of this site is from 2021-12-15. CLEAR
- It is hosted on AS-HOSTINGER, from a server in GB. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about one-keys.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
