

Is onecloud.ma legit? TrustSniffer's high-trust assessment: 90/100

onecloud.ma

Verdict

90

OUT OF 100

HIGH TRUST

onecloud.ma appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-01 by automated analysis. Classification confidence 70%.

What this site appears to be

OneCloud presents itself as a Moroccan cloud technology partner offering private, public, hybrid, and multicloud infrastructure, security, applications, licensing, integration, analytics, AI, database solutions, and technical support. The page includes generic testimonials, news content, social links, a contact form, and privacy-law disclosures.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2018.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

OneCloud is a Moroccan cloud-technology partner presenting private, public, hybrid, and multicloud infrastructure alongside security, licensing, applications, integration, analytics, artificial intelligence, database, and technical-support services for business customers.

Scam/Impersonation Risk

No scam, phishing, blacklist, or impersonation contradictions were observed. The homepage presents a coherent corporate-services model based on technology implementation, resale, consulting, and support rather than deposits or investment returns. The only material content concern is that the contact information and physical business presence are not independently verifiable from the supplied page material; this is a minor contact-integrity gap, not evidence of impersonation.

- The homepage is identified as a corporate website with no login form, hidden form, wallet-connect behavior, or phishing indicators.
- External reputation telemetry recorded zero malicious detections, zero suspicious detections, and zero abuse reports.
- The domain is registered through ADK MEDIA on 2023-05-12 and is recorded as 3.22 years old.
- Historical coverage contains 29 snapshots spanning 2018–2026, with 9 years tracked.

Regulatory Verification Notes

The site includes privacy-law disclosures and presents a conventional business-to-business technology-services model. No licensing claim or license number is visible in the supplied content; this is a regulatory-transparency point for procurement review, not a legitimacy contradiction. No matching third-party broker profile was identified.

- The homepage contains a contact form accepting name, email, and telephone details.
- The site's hosting resolves through AS13335, Cloudflare, Inc.
- TLS is issued by WE1 at DV validation level and is valid through 2026-10-25.
- The registration record identifies ADK MEDIA as registrar and ONE CLOUD as the organization.

What to Verify Next

Before formal enterprise onboarding, the contracting entity, commercial registration, service authorization, and support contacts should be matched through independently sourced business records and the relevant

Moroccan registry. Any regulated service scope, if later introduced, should be checked against the applicable regulator’s register.

- The homepage provides privacy disclosures but no visible license number.
- The supplied page analysis identifies an unverifiable contact or address as the sole content red flag.
- Social links are provided for LinkedIn, Twitter, and YouTube and can support independent channel confirmation.

Summary Verdict

OneCloud presents as a legitimate, established, and trustworthy corporate technology provider with no observed contradiction or confirmed malicious reputation. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

Cloudflare CDN and WAF protection sit in front of the site, with all observed addresses belonging to CDN edge infrastructure and no origin candidate observed. This reduces direct origin exposure and is a mitigating infrastructure signal, but does not independently establish legitimacy.

Closing Assessment

Normal browsing, account login, and standard account actions are appropriate; ordinary enterprise vendor due diligence remains suitable before contractual commitments.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	78%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of onecloud.ma.

- The request stayed on onecloud.ma. It was not redirected to another domain. CLEAR
- Registration is published under ADK MEDIA. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2028-05-12. CLEAR
- The earliest public archive of this site is from 2018-08-09. CLEAR

- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about onecloud.ma at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
