Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2020.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

OneMarketer is a corporate B2B software and services platform focused on conversational commerce, WhatsApp-based sales, omnichannel customer support, marketing automation, chatbots, ecommerce automation, and customer-experience management across multiple industries.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent SaaS business model, substantial product and industry content, and a “Request a Trial” pathway rather than deceptive financial offers, credential harvesting, or malware-related behavior. Historical coverage is continuous enough to support an established identity, with no evidence of suspicious repurposing or brand impersonation. Normal interaction, including account login and standard use, is appropriate.

- The homepage identifies OneMarketer as a corporate SaaS platform and presents conversational-commerce, WhatsApp, chatbot, automation, and customer-experience offerings.
- Page behavior recorded no login form, hidden sensitive form, wallet activity, clipboard hijacking, cloaking, or suspicious inline scripts.
- Domain registration: 2020-06-16; age 6.13 years.
- Web archive: 88 snapshots spanning 2020–2026, covering 7 tracked years.

Regulatory Verification Notes

The site presents enterprise software and implementation services rather than a regulated financial product. The supplied content does not identify a specific financial license or regulatory authorization; this is a transparency point for contractual or regulated-sector onboarding, not evidence of misconduct. External reputation checks found no malicious or suspicious detections, and no broker-related match was identified.

- The homepage describes a SaaS and enterprise-services business model with subscriptions, platform usage, implementation, or service-contract revenue.
- Hosting resolved to AS15169, Google LLC / Google Cloud, United States.
- The site uses a DV TLS certificate issued by RapidSSL TLS RSA CA G1, valid through 2026-12-11.
- The homepage and associated content contain no stated license number or regulatory authorization.

What to Verify Next

For enterprise procurement, confirm the contracting legal entity, applicable data-processing terms, and any sector-specific authorization required for the intended deployment. Licensing or registration should be checked directly with the relevant official registry where the proposed use involves regulated services.

- The homepage provides broad product and industry claims but does not supply a clear regulatory disclosure in the supplied content.
- The site links to established social platforms including WhatsApp, Instagram, Facebook, Telegram, and X.
- The homepage offers a trial-request workflow suitable for controlled vendor onboarding.

Summary Verdict

OneMarketer presents as a legitimate, established, and trustworthy B2B technology provider with a coherent commercial purpose, stable historical presence, clean reputation indicators, and no observed contradiction or impersonation signal. The evidence supports normal business interaction and standard account use.

Infrastructure Integrity

The site resolves to a single likely origin address with no CDN detected. Google Cloud hosting and valid transport encryption provide baseline infrastructure integrity, although hosting protections alone are mitigating context rather than proof of legitimacy.

Closing Assessment

Standard engagement is proportionate, with normal enterprise due diligence applied to contracting, data handling, and service suitability.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	38%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of onemarketer.net.

- The request stayed on onemarketer.net. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by googledomains.com, across 4 name servers. NOTED
- The registration is paid up to 2028-06-16. CLEAR

- The earliest public archive of this site is from 2020-09-26. CLEAR
- It is hosted on GOOGLE, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about onemarketer.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
