- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2011.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

A Russian-language travel booking and marketplace website, Online Express presents visitors with tools for arranging flights, hotels, transfers, travel insurance and related services, with an apparent business model based on booking commissions and service fees.

Scam/Impersonation Risk

No contradictions were observed. The site's captured homepage presents a coherent travel-booking interface rather than a phishing or impersonation surface: the analysis found no brand-impersonation indicators, hidden forms, sensitive credential forms, or untrusted form destinations. This conclusion is reinforced by clean external reputation results, an established traffic footprint, and sustained historical continuity. The operator's real-world identity remains independently unverified, so the evidence supports an apparently legitimate established site rather than proving the identity of the underlying business.

EVIDENCE

- Homepage: Russian-language travel-booking content, search controls and booking forms were present, with no detected phishing indicators or hidden forms.
- Domain registration: registered 2006-09-24 (~19.89 years old).
- Web archive: 235 snapshots spanning 2011–2026 (16 years tracked).
- External reputation: 0 malicious detections, 0 suspicious detections, and no confirmed blacklist or impersonation match.

Regulatory Verification Notes

The homepage describes a commercial travel intermediary covering flights, hotels, tours, transfers, DMC services and insurance. That model can involve consumer, agency and payment obligations, but the available site evidence does not identify a licensing authority or registration number; this is a verification and disclosure gap, not evidence of a scam. The page provides support contact details and a booking workflow, while the domain is registered through BEGET-RU. Transport encryption is provided through a valid, known-issuer DV certificate. No matching broker signal was identified in the available third-party context, although that context is not a legal or regulatory determination.

EVIDENCE

- Homepage: titled “Online Express - единая система бронирования” and presents flight, hotel, transfer, DMC and insurance booking functions.
- Domain registration: registrar BEGET-RU; creation date 2006-09-24T20:00:00Z; expiration date 2027-09-24T21:00:00Z.
- Hosting and TLS: served from AS196695 (NETONERUS - NetOne Rus JSC, RU); TLS certificate issued by GlobalSign GCC R6 AlphaSSL CA 2025 (DV), valid to 2027-03-21.
- Reputation context: no match was returned by the available broker-intelligence dataset.

What to Verify Next

Before credential or payment interactions, an independent check should connect the Online Express trading identity to a verifiable merchant or agency entity, confirm applicable travel-agency or insurance-distribution permissions with the relevant registry where required, and review cancellation, refund, supplier and payment-protection terms. Contact details should be confirmed through an independently sourced route rather than relying solely on the website’s own presentation.

EVIDENCE

- Homepage: displays a support phone contact and booking interface, making independent confirmation of the merchant relationship and fulfilment responsibility appropriate.
- Booking workflow: supports searches and reservations rather than merely providing informational travel content, so refund and payment-protection terms are material to transaction review.
- Available business-model assessment: no license authority or license number was identified for independent confirmation.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture with no observed scam or impersonation contradiction. The principal residual uncertainty concerns independent attribution of the operating entity, not evidence of malicious website behavior.

Infrastructure Integrity

The site resolves directly to one identified IP associated with AS196695 and NETONERUS - NetOne Rus JSC in Russia; no CDN or WAF was identified and an origin candidate is visible. This provides less edge-layer shielding than a mainstream CDN deployment, but the resolved infrastructure and valid TLS materially support transport integrity and do not, by themselves, indicate abuse.

Closing Assessment

Ordinary browsing and routine use are proportionate to the assessed posture, while independent merchant-identity, consumer-terms and payment-protection checks should precede credential submission or payment.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of online-express.ru.

- The request stayed on online-express.ru. It was not redirected to another domain. CLEAR
- Registration is published under BEGET-RU. CLEAR
- DNS for this domain is served by net., across 2 name servers. NOTED
- The registration is paid up to 2027-09-24. NOTED
- The earliest public archive of this site is from 2011-09-27. CLEAR
- It is hosted on NETONERUS, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about online-express.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
