

Is onthemarket.com legit? TrustSniffer's high-trust assessment: 100/100

onthemarket.com

Verdict

100

OUT OF 100

HIGH TRUST

onthemarket.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-10 by automated analysis. Classification confidence 55%.

What this site appears to be

OnTheMarket is a UK property marketplace listing homes for sale and rent, offering instant valuations, agent discovery and member services; site content and navigation indicate an established commercial portal.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

This website is OnTheMarket, a UK property marketplace presenting residential and commercial properties for sale and rent, with property searches, instant valuations, agent discovery, new-home listings, rental services, and member functionality; its apparent business model is an established commercial portal supported by agent memberships, listing services, advertising, and lead generation.

Scam/Impersonation Risk

No contradictions were observed. The homepage, navigation, and available functionality present a coherent property-marketplace service rather than an investment, cryptocurrency, or high-pressure financial offering. The presence of a sign-in/register form is consistent with member services, and the observed browsing behavior found no brand-impersonation, phishing, cloaking, hidden-form, wallet, or credential-redirection indicators. External reputation checks were clean, and the site has a strong global traffic footprint, supporting the conclusion that it is apparently legitimate and low risk, while not independently proving the real-world operator identity.

EVIDENCE

- The homepage identifies the service as “OnTheMarket | Property, Houses & Flats for Sale & to Rent” and exposes coherent functions including agent finding, valuations, sales, rentals, and new homes.
- Two successful browser runs recorded no cloaking, hidden forms, suspicious inline scripts, wallet activity, clipboard manipulation, or external password forms.
- Evaluated reputation checks recorded 0 malicious and 0 suspicious results; the site’s traffic rank was 6696 and it was within the top 1 million sites.

Regulatory Verification Notes

The site’s apparent commercial purpose is clear, but the supplied page evidence does not independently verify the legal entity operating the portal. No licensing claim, licensing authority, or licence number is presented in the available analysis; for a property marketplace this is a disclosure and verification matter rather than evidence of impersonation or fraud. The About, Contact, Privacy Notice, and Cookie Policy pages provide relevant locations for reviewing corporate, contact, and data-handling disclosures. A third-party broker-reputation check returned no match, which is contextual support only and is not a licensing or regulatory determination.

EVIDENCE

- The domain was registered on 1997-09-17 and is 28.92 years old.
- The domain uses MarkMonitor Inc. as registrar, with registration expiry recorded as 2027-11-16.
- Hosting is recorded on AS16509, Amazon.com, Inc. (AMAZON-02), US.
- TLS uses the Amazon RSA 2048 M01 issuer at DV validation level and is valid to 2026-10-19.

What to Verify Next

Before credential or payment interactions, an enterprise or consumer should independently confirm the operator details shown on the About and Contact pages, confirm any property-service or consumer-protection obligations applicable to the intended transaction with the relevant official registry, and review the applicable privacy, cookie, cancellation, and payment-protection terms. Account access should be initiated from the verified domain reached through an independent route, and any financial commitment should use established payment protections appropriate to the transaction.

EVIDENCE

- The homepage links to About Us, Contact Us, Privacy Notice, and Cookie Policy pages that can be reviewed as primary disclosure points.
- The site exposes Sign in/Register and valuation-related forms, making domain and operator confirmation relevant before submitting personal information.
- The commercial model includes agent memberships, listing services, advertising, and lead generation, so the specific relationship with an agent or advertiser should be confirmed separately for material transactions.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust, low-risk posture. No scam, phishing, impersonation, or identity-conflict indicators were identified, although the real-world operator identity remains independently unverified.

Infrastructure Integrity

The site is protected by AWS CloudFront CDN/WAF infrastructure, with observed addresses belonging to CDN edge servers rather than an exposed origin. This reduces direct origin exposure and is a useful defensive control, but remains a mitigating infrastructure signal rather than proof of corporate legitimacy.

Closing Assessment

Normal browsing is proportionate to the available risk assessment; before credentials, personal data, or payments are submitted, ordinary independent checks of the counterparty, transaction terms, and payment protections should be completed.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of onthemarket.com.

- The request stayed on onthemarket.com. It was not redirected to another domain. CLEAR
- Registration is published under MarkMonitor Inc.. CLEAR
- DNS for this domain is served by awsdns-13.com, across 4 name servers. NOTED
- The registration is paid up to 2027-11-16. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about onthemarket.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
