

Is ooi.cc legit? TrustSniffer's high-trust assessment: 100/100

ooi.cc

Verdict

100

OUT OF 100

HIGH TRUST

ooi.cc appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

A personal portfolio for Vincent Ooi listing multiple SaaS products, open-source work, and photography. No forms or payment collection visible on the captured page; primarily informational links to projects and services.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

The page as captured

<https://www.ooi.cc/>

What ooi.cc served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2006.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

A personal portfolio website presents software products, open-source work, and photography, with an apparent business model based on SaaS products, annual billing, and related commercial services.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there is no phishing, impersonation, blacklist, malicious-content, or conflicting-identity finding. The portfolio presentation is consistent with a personal technology-builder profile rather than a deceptive financial or credential-harvesting service. A third-party infrastructure record contains abuse reports associated with a shared provider IP, but the IP was whitelisted, confidence was zero, and the attribution was explicitly discounted because the reports apply to shared infrastructure rather than this website. The available evidence therefore supports an apparently legitimate, low-risk posture, while independently proving the real-world operator identity remains outside the evidence.

EVIDENCE

- The registration record shows creation on 2004-08-03T13:34:03Z, making the domain 22.06 years old; registrar: Key-Systems GmbH.
- Historical coverage records first seen on 2006-07-05T19:19:22Z and last seen on 2026-02-21T13:33:58Z, with 21 years tracked; coverage is sparse rather than evidence of a recent domain.
- The external infrastructure record reports 14 abuse reports for IP 216.150.1.193, attributed to Vercel, Inc. shared CDN infrastructure, with whitelist status true and confidence score 0.

Regulatory Verification Notes

The captured homepage identifies a personal technology portfolio and does not present a regulated financial-service offering. It also does not disclose a license, registration number, or formal regulatory authority; this is a transparency item for any linked commercial service, not evidence of a scam. The apparent identity context is consistent with the page presentation, but the operator's real-world identity is not independently verified. No matching third-party broker profile was found in the supplied reputational dataset.

EVIDENCE

- The homepage presents Vincent Ooi as a builder, developer, and photographer and identifies "dasecure solutions" as a software company.
- The site is served from AS16509, Amazon.com, Inc., US.
- The site's TLS certificate is issued by YR2, uses Domain Validation (DV), and is valid to 2026-10-31T19:49:20+00:00.

What to Verify Next

Before credential or payment interactions with any linked SaaS service, an independent check should confirm the contracting merchant identity, applicable billing terms, refund or cancellation provisions, and available payment protections. Any claim that a linked service is subject to sector-specific regulation should be checked directly with the relevant official registry. Contact and social channels should be validated through an independent route before they are relied upon for account recovery or payment support.

EVIDENCE

- The captured homepage contains 0 forms, no login form, and no sensitive-data form.
- The page is primarily informational and presents links to software, open-source work, and photography rather than collecting payment details directly.
- Observed behavior recorded 2 successful runs, with 0 hidden forms and 0 wallet-drainer or wallet-provider detections.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust, low-risk posture and no observed scam or impersonation contradictions. The classification supports ordinary informational engagement and normal service use, but it does not constitute independent proof of the real-world operator identity.

Infrastructure Integrity

Cloudflare CDN/WAF protection provides a mitigating layer against common exposure and delivery risks. The infrastructure includes observed CDN edge servers and potential origin candidates; this is a normal hosting configuration and does not, by itself, establish legitimacy.

Closing Assessment

Ordinary use is proportionate to the available evidence, subject to independent merchant-identity, terms, and payment-protection checks before credentials or payments are submitted.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 14 reports on hosting IP 216.150.1.193 (Vercel, Inc, Content Delivery Network), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ooi.cc.

- The request stayed on ooi.cc. It was not redirected to another domain. CLEAR
- Registration is published under Key-Systems GmbH. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-08-03. NOTED
- The earliest public archive of this site is from 2006-07-05. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ooi.cc at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
