Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Open Banking Limited's website is an established UK information and coordination portal for the open-banking ecosystem, presenting educational material, technical standards, regulatory resources, provider directories, API performance information, industry news, and organizational information rather than soliciting deposits or investment returns.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent organizational identity, substantive open-banking content, regulated-provider resources, and no apparent impersonation, phishing, malicious behavior, or sensitive-data collection. Its business model is informational and industry-coordination focused, which is consistent with the content observed.

- The homepage identifies Open Banking Limited and provides extensive educational, regulatory, ecosystem, and organizational content.
- The homepage contains no login form, sensitive form, wallet connection, or hidden form.
- External reputation screening found no malicious or suspicious detections, blacklist hit, or abuse reports.

Regulatory Verification Notes

The site provides clear organizational context through its About Open Banking Ltd and leadership sections, while also distinguishing its own industry role from regulated providers listed in its ecosystem resources. No specific financial-services license or registration number is claimed on the reviewed page; this is a transparency item for formal procurement or regulatory due diligence, not evidence of deception. Domain registration and transport security provide additional signs of an established web presence.

- The homepage links to About Open Banking Ltd, leadership, external engagement, careers, regulatory resources, and regulated-provider directories.
- The domain was registered on 2016-09-27 and is approximately 9.85 years old; registrar: Gandi [Tag = GANDI].
- Served from AS16509, AMAZON-02 - Amazon.com, Inc., US.
- TLS certificate issued by Amazon RSA 2048 M01, DV validation, valid to 2026-11-24T23:59:59+00:00.

What to Verify Next

For regulated procurement, confirm the legal status and any authorization relevant to the specific proposed engagement through the applicable official registry. Use the organization’s published channels and independently validated contact details for formal correspondence.

- The site provides dedicated organizational and regulatory sections suitable for document-level review.
- Its provider directory separates Open Banking Limited’s coordination role from regulated ecosystem participants.

Summary Verdict

The website presents as a legitimate, established, and high-trust organizational information service. Its identity, content, technical posture, and external reputation converge without contradictory signals, supporting normal interaction and standard use.

Infrastructure Integrity

AWS CloudFront provides CDN/WAF protection, and all observed addresses were CDN edge servers with no origin candidate observed. This reduces direct exposure of the underlying service infrastructure and is a mitigating security measure, not proof of legitimacy by itself.

Closing Assessment

Normal browsing, account access where offered, and standard interaction are appropriate, subject to ordinary institutional procurement and compliance controls.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of openbanking.org.uk.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about openbanking.org.uk at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
