

Is openpay.mx legit? TrustSniffer's high-trust assessment: 80/100

openpay.mx

Verdict

80

OUT OF 100

HIGH TRUST

openpay.mx appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-10 by automated analysis. Classification confidence 75%.

What this site appears to be

Openpay Spanish-language product page describing payment solutions (links, gateway, card/cash/bank transfer options), pricing/comissions, sandbox for testing, and contact/support information. Targeted at merchants in Mexico and Latin America.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Openpay.mx is a Spanish-language corporate payment-processing website for merchants in Mexico and Latin America, presenting payment links, an online gateway, card, cash, and bank-transfer options, processing commissions, ecommerce integration, and a sandbox for testing; its apparent business model is to facilitate merchant payments for a fee.

Scam/Impersonation Risk

No contradictions were observed: the supplied evidence shows no phishing, impersonation, blacklist, or malicious-content indicators. The homepage presents a coherent payment-processor business model, with identifiable product descriptions, support routes, and merchant-oriented account functions rather than deceptive or abusive interaction patterns. Independent reputation observations were clean, and the site's long registration continuity and sustained historical presence materially support an established-site assessment. The available identity evidence is consistent with Openpay, but it does not independently prove the real-world operator's identity.

EVIDENCE

- The homepage describes Openpay payment services and contains no reported red-flag or brand-impersonation indicators.
- The domain was registered on 2013-05-29 and is approximately 13.21 years old; registrar: Gandi SAS; expiry: 2027-05-29.
- Web archives record 223 snapshots from 2013-12-01 through 2026-06-23, covering 14 years with a maximum observed gap of one year.
- External reputation checks recorded 0 malicious detections and 0 suspicious detections; the site has traffic rank 121404 and is within the top 1 million.

Regulatory Verification Notes

The site's available business and support content identifies Openpay and targets commercial users in the region, while its claim of BBVA backing or partnership should be treated as an on-site representation rather than independent confirmation. No licensing or registration number is disclosed in the supplied page content, so the regulatory status and exact contracting entity require ordinary external confirmation; this is a transparency and verification matter, not evidence of a scam. The evidence supports an apparently legitimate, established commercial site, but the operator identity remains only likely rather than independently verified.

EVIDENCE

- The homepage identifies Openpay, presents merchant-facing support and contact information, and references BBVA backing or partnership.
- The site is served from AS14618, AMAZON-AES — Amazon.com, Inc., US.
- The transport certificate is DV-validated, issued by Amazon RSA 2048 M04, and valid through 2026-12-07.

What to Verify Next

Before credential or payment interactions, the prospective merchant should match the contracting entity named in the registration and commercial documentation against the relevant corporate and financial-services records. The published pricing, commissions, settlement, refund, and dispute terms should be reconciled with the proposed merchant agreement, and support channels should be confirmed through an independently sourced route. Payment-protection arrangements and the treatment of merchant funds should also be established before committing material value.

EVIDENCE

- The homepage's "Registrar mi negocio" route is the relevant point for matching the contracting entity and registration details.
- The site's commissions and pricing content provides the basis for reconciling commercial terms with the merchant agreement.
- The site's support and contact routes provide channels that can be independently confirmed before account or payment activity.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust, low-risk posture and no observed scam or impersonation contradictions. The classification is strong enough to support ordinary business consideration, while the real-world operator connection remains unverified rather than proven.

Infrastructure Integrity

The website is protected by AWS CDN/WAF infrastructure. The observed addresses are CDN edge servers, with no origin-server candidate identified in this analysis; this provides a meaningful exposure-mitigation signal but is not, by itself, proof of legitimacy.

Closing Assessment

Normal evaluation may proceed, provided ordinary independent checks of merchant identity, contractual terms, return or dispute arrangements, and payment protection are completed before credentials or funds are committed.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of openpay.mx.

- The request stayed on openpay.mx. It was not redirected to another domain. CLEAR
- Registration is published under Gandi SAS. CLEAR
- DNS for this domain is served by awsdns-21.org, across 4 name servers. NOTED
- The registration is paid up to 2027-05-29. NOTED
- The earliest public archive of this site is from 2013-12-01. CLEAR
- It is hosted on AMAZON-AES, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about openpay.mx at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a

legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
