

Is openpay.pe legit? TrustSniffer's high-trust assessment: 100/100

openpay.pe

Verdict

100

OUT OF 100

HIGH TRUST

openpay.pe appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-01 by automate analysis. Classification confidence 55%.

What this site appears to be

Openpay Perú presents BBVA-backed payment solutions for businesses, including Smart POS, online payment gateways, and payment links. The page includes commissions, security information, support contacts, legal policies, and regional presence.

Key findings

- Automated classification: Not Scam.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Openpay Perú is a corporate payment-services website presenting merchant acquiring, payment processing, and business payment solutions, with an apparent model based on transaction commissions and related service fees.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand-impersonation signals, or confirmed blacklist findings were observed. The homepage presents a coherent commercial offering—Smart POS, payment gateways, payment links, card and alternative payment methods—and identifies BBVA support, regional operations, security information, and customer assistance. The business model is consistent with a legitimate B2B payments provider, and normal account login and standard use are appropriate.

- Homepage: coherent merchant-payment offering with no reported red flags.
- Homepage behavior: no hidden forms, wallet activity, suspicious scripts, cloaking, or untrusted sensitive-form destinations.
- External reputation checks: zero malicious and zero suspicious detections, with no blacklist result.

Regulatory Verification Notes

The site identifies Openpay Perú and presents BBVA backing, legal policies, commissions, support information, and operations across Mexico, Colombia, Perú, and Argentina. No licensing claim or license number is stated in the supplied material; this is a regulatory-transparency item for confirmation, not evidence of fraud. Registration details identify Openpay SAPI as the owner and Marcaria.com LLC as registrar.

- Hosting: Served from AS14618, Amazon-AES / Amazon Data Services, United States.
- TLS: Amazon RSA 2048 M01, domain validation (DV), valid through 2026-12-08.
- Registration: Registrar listed as Marcaria.com LLC; registrant/owner listed as Openpay SAPI.

What to Verify Next

Confirm the applicable payment-services authorization and entity details through the relevant Peruvian registry, and reconcile the published commissions and contractual terms with the formal merchant agreement. Independently confirm official support and onboarding channels before making material commercial commitments.

- Homepage: commissions and payment-method information are presented for review.
- Homepage: legal policies, support contacts, and certification information are available.

- Homepage: BBVA association and regional presence are explicitly stated.

Summary Verdict

The website presents a legitimate, established, high-trust posture with coherent business identity, substantive service information, clean security indicators, and no observed contradiction signals. Its content and technical behavior support normal business interaction.

Infrastructure Integrity

The site uses Amazon infrastructure with AWS CDN/WAF protection; observed addresses were edge servers on AS14618, and no origin candidate was identified. This reduces direct origin exposure and is a mitigating infrastructure characteristic, although it is not by itself proof of legitimacy.

Closing Assessment

Standard browsing, account login, and ordinary business use are appropriate, subject to routine confirmation of contractual and regulatory details for material transactions.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of openpay.pe.

- The request stayed on openpay.pe. It was not redirected to another domain. CLEAR
- Registration is published under Marcaria.com LLC. CLEAR
- DNS for this domain is served by awsdns-20.com, across 4 name servers. NOTED
- It is hosted on AMAZON-AES, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about openpay.pe at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
