

Is openpaye.co legit? TrustSniffer's high-trust assessment: 99/100

openpaye.co

Verdict

99

OUT OF 100

HIGH TRUST

openpaye.co appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-03 by automated analysis. Classification confidence 70%.

What this site appears to be

French marketing homepage for OpenPaye, an online payroll SaaS serving SMEs, payroll professionals, and accounting firms. It describes payroll generation, DSN submissions, regulatory updates, employee-document management, SEPA file generation, customer testimonials, pricing navigation, documentation, legal pages, and contact channels.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2020.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

OpenPaye is an established French online payroll software service for small and medium-sized businesses, payroll professionals, and accounting firms, presenting tools for payslip production, French social declarations, employee-document management, regulatory updates, deadline alerts, and SEPA-file generation through a subscription-based SaaS model.

Scam/Impersonation Risk

No identity contradictions, impersonation indicators, phishing behavior, or confirmed malicious reputation signals were observed. The homepage presents a coherent commercial identity and a mature product proposition, while the domain's long registration history and continuous archived presence support provenance. Interactive testing identified no credential diversion, hidden forms, cloaking, wallet-related behavior, clipboard manipulation, or untrusted form destinations.

- Domain-registration records show registration through GoDaddy.com, LLC on 10 August 2018, making the domain approximately 7.99 years old; registration runs through 10 August 2029.
- Web archives contain 29 snapshots from 22 September 2020 to 21 May 2026, spanning 7 tracked years, with no detected semantic repurposing.
- Homepage analysis found no embedded login form, sensitive form, hidden form, brand impersonation, or deceptive financial or cryptocurrency proposition.
- External reputation checks recorded zero malicious and zero suspicious detections, no malicious safe-browsing classification, no abuse reports, and an established top-one-million traffic position at rank 193,648.

Regulatory Verification Notes

The supplied homepage provides navigation to legal notices, privacy and cookie information, pricing, documentation, partners, integrators, and company information. No sector-specific licence or authorization claim appears in the assessed content; for a payroll SaaS provider, that absence is not itself evidence of misconduct or illegitimacy. Private domain-registration details are an administrative registration arrangement and do not conflict with the site identity. No matching broker-related reputational record was identified, although such a dataset is not authoritative for payroll-software regulation.

- The homepage navigation includes "Mentions légales," "Confidentialité et cookies," "À propos," pricing, documentation, partner, and integrator pages.
- The supplied homepage content makes no licence claim and identifies no licence authority or licence number.

- Registration records identify Domains By Proxy, LLC as the privacy service for the registrant.
- The site is served from AS20473 by AS-VULTR – The Constant Company, LLC, US; its DV TLS certificate was issued by Sectigo Public Server Authentication CA DV R36 and is valid until 27 October 2026.

What to Verify Next

Enterprise onboarding should include review of the legal notices for the contracting entity and registered address, examination of the privacy documentation and data-processing terms, and confirmation of security, availability, retention, and incident-response commitments. Procurement teams should also validate the official contact channels independently and obtain contractual evidence appropriate to the sensitivity of payroll and employee data.

- The legal-notices and privacy pages are linked from the homepage and are the appropriate sources for contracting-entity and data-governance review.
- The pricing and documentation pages provide the appropriate basis for confirming service scope, commercial terms, and operational procedures.
- The partners and integrators pages provide an identified route for checking claimed ecosystem relationships.
- The homepage offers contact and account-access routes that can be reconciled with procurement documentation during onboarding.

Summary Verdict

OpenPaye is a legitimate, established, and trustworthy website supported by convergent identity, provenance, reputation, content-quality, and behavioral evidence. No contradictory risk indicators were found, and normal interaction—including account login and standard use—is appropriate.

Infrastructure Integrity

The service resolves to a single US-hosted address assessed as the likely origin, with no CDN or WAF layer detected. This is a conventional direct-hosting configuration; it should be treated as neutral infrastructure context rather than independent proof of legitimacy.

Closing Assessment

Prospective users may proceed with normal use, while regulated or enterprise customers should complete standard supplier, privacy, security, and contractual due diligence before production onboarding.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	38%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of openpaye.co.

- The request stayed on openpaye.co. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2029-08-10. CLEAR
- The earliest public archive of this site is from 2020-09-22. CLEAR
- It is hosted on AS-VULTR, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about openpaye.co at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
