

Is opserum.co.uk safe? TrustSniffer's moderate-trust assessment: 100/100

opserum.co.uk

Verdict

100
OUT OF 100

HIGH TRUST

opserum.co.uk appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-10-01 by automated analysis. Classification confidence 75%.

What this site appears to be

Meddix product catalog and informational site for professional cosmetic products (serums, masks, chemical peel formulations). Includes product lists, concentration tables, blog entries, certificates inquiry, contact email and a London address. No visible payment flows or login forms on the captured page.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://opserum.co.uk/>

What opserum.co.uk served when TrustSniffer captured it on 2026-10-01. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2019.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a Meddix product catalogue and informational site for professional cosmetic products, presenting serums, masks, massage oils, non-injection mesotherapy products, and chemical-peel formulations for clinicians, professionals, and other buyers; its apparent business model is product sales and buyer enquiries.

Scam/Impersonation Risk

No contradictions were observed. The captured site presents a consistent cosmetics-manufacturer purpose, publishes detailed product categories and concentration information, and shows no detected phishing, brand-impersonation, malicious-content, or suspicious interaction indicators. External reputation checks were clean, with no malicious or suspicious detections and no abuse reports, supporting the conclusion that the site is apparently legitimate and low risk from a scam or impersonation perspective. The operator's real-world identity remains independently unverified, so the site's apparent legitimacy should not be treated as proof of a particular legal entity.

EVIDENCE

- The homepage identifies the business as “Meddix Cosmetic Manufacturer” and lists professional cosmetic categories, including serums, masks, mesotherapy products, and chemical-peel formulations.
- The site’s historical record shows 36 archive snapshots spanning 2019–2026, covering 8 years, with no detected suspicious repurposing or semantic drift.
- Captured interaction testing found no login form, hidden sensitive form, wallet connection, clipboard hijacking, cloaking, or suspicious inline scripts.

Regulatory Verification Notes

The captured content supports a commercial manufacturer-and-seller profile and includes product information, a certificate-enquiry facility, contact details, and a London address. It does not visibly state a licensing authority, registration number, or independently verifiable regulatory approval; this is a transparency item for commercial and product-compliance review rather than evidence of a scam. The available evidence is consistent with an established website, while the responsible legal operator is not independently verified. The domain is registered through PDR Ltd. d/b/a PublicDomainRegistry.com, and its transport encryption is valid, although the certificate is domain-validated rather than organization-validated.

EVIDENCE

- Domain registration: 2019-02-04; age 7.66 years; expiry 2027-02-04.
- Hosted on AS46606, Unified Layer, US.
- TLS certificate issued by YR1 (DV), valid to 2026-12-19.
- The product catalogue specifies chemical-peel concentrations including 25% AHA with 15% BHA, 28% AHA with 14% BHA, 30% AHA, and 35% AHA, making product documentation and applicable cosmetic-safety requirements relevant verification matters.

What to Verify Next

Before a commercial order or credential submission, the prospective counterparty should independently confirm the business identity associated with the published address, obtain applicable product certificates and compliance documentation through an independently confirmed contact route, and review written returns, delivery, payment-protection, and dispute terms. For professional use, product concentrations and intended-use restrictions should also be reconciled with the buyer’s applicable clinical and cosmetic requirements.

EVIDENCE

- The homepage provides product descriptions and concentration tables but does not display a visible regulatory licence or registration number.
- The site offers a certificate enquiry function, providing a specific channel through which product documentation can be requested and validated.
- The captured pages show no visible payment flow or account-login form, so transaction and credential controls should be confirmed through the final purchasing channel.

Summary Verdict

The overall posture is high trust and low risk, with converging evidence of a stable, content-rich, apparently legitimate commercial website and no observed scam, phishing, impersonation, or malicious-content contradiction. Confidence is strong at the site-classification level, but the real-world operator identity is not independently verified.

Infrastructure Integrity

The site resolves to one likely origin IP and does not use a detected CDN or WAF. This provides less edge-layer shielding than a CDN-protected deployment, but the observed infrastructure is a resolved, stable hosting configuration rather than evidence of malicious activity.

Closing Assessment

Ordinary engagement may proceed proportionately, provided merchant identity, product documentation, return terms, and payment protections are independently confirmed before credentials or payment details are submitted.

Written analysis generated 2026-10-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by page content, registration and ownership.

- 01 Page content

 - The page has no description for search engines, which established sites usually provide.
Page content rule:PAGE_SEO_MISSING_META
 - The page carries none of the structured previews for search and social sharing that established sites usually provide.
Page content rule:PAGE_SEO_NO_STRUCTURED
- 02 Registration and ownership

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of opserum.co.uk.

- The request stayed on opserum.co.uk. It was not redirected to another domain. CLEAR
- Registration is published under PDR Ltd. d/b/a PublicDomainRegistry.com. CLEAR
- DNS for this domain is served by net., across 2 name servers. NOTED
- The registration is paid up to 2027-02-04. NOTED
- The earliest public archive of this site is from 2019-03-03. CLEAR
- It is hosted on UNIFIEDLAYER-AS-1, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about opserum.co.uk at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
