

Is optionstraderx.com a scam? TrustSniffer's high-risk assessment: 0/100

optionstraderx.com

Verdict

0

OUT OF 100

CRITICAL RISK

optionstraderx.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Marketing landing page for Options Trader X: a subscription SaaS that provides options screeners, portfolio tracking, IV dashboards, AI assistant integrations, and analytics. Offers 14-day free trial and \$199/mo professional plan.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

https://optionstraderx.com/

What optionstraderx.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a marketing landing page for Options Trader X, a subscription SaaS platform presenting options-trading screeners, portfolio tracking, implied-volatility dashboards, spread-building tools, technical indicators, and AI-assisted trading analysis. Its apparent business model is a 14-day free trial followed by a professional subscription advertised at \$199 per month.

Scam/Impersonation Risk

The site presents a coherent trading-software proposition and the content review found no explicit brand-impersonation, phishing, or credential-harvesting indicators. However, this benign presentation is outweighed by confirmed blacklist status and multiple external malicious detections, including tier-one threat detections. The authoritative assessment therefore treats sensitive interaction as unsafe. The evidence does not establish a conflicting legal identity or a confirmed impersonation of a named brand, but the external reputation signal is sufficiently severe to warrant a security-forward posture.

EVIDENCE

- The homepage describes Options Trader X as an options-analysis SaaS and reports no content-level red flags.
- External reputation checks recorded 14 malicious detections from 19 effective evaluations, with tier-one threat detections present.
- The domain is confirmed on external blacklists; the recorded blacklist sources are VT and EXTERNAL_BLACKLIST.
- Domain registration telemetry records creation on 2026-01-06 through NAMECHEAP INC, with an age of 0.62 years.

Regulatory Verification Notes

The available site evidence does not identify a licensing authority, registration number, or verified regulated status. That is a material verification gap for a service supporting investment research and trading decisions, although the absence of a stated license is not by itself proof of fraud. Real-world operator identity remains unverified, and the available material does not independently connect the site to a legal entity. The transport and hosting signals confirm technical deployment but do not validate ownership, authorization, or financial-services compliance.

EVIDENCE

- The available homepage material presents subscription pricing and trading-analysis functionality but no licensing authority or license number.
- The site is served from AS13335, operated by CLOUDFLARENET - Cloudflare, Inc., US.
- The TLS certificate is issued by WE1 at DV validation level and is valid to 2026-10-02.

What to Verify Next

Before any login, trial enrollment, payment, or transmission of trading-related information, an independent offline or registry-based process should confirm the operator's legal name, corporate registration, applicable financial-services authorization, subscription terms, cancellation rights, and data-handling obligations. Official support and contact channels should be confirmed through an independently obtained source rather than relying solely on the website. Any account used for testing should avoid reuse of credentials from financial or other sensitive services.

EVIDENCE

- The homepage contains two forms, including a login form and a signup/trial form.
- Interactive testing recorded 2 successful runs, 7 console errors, and a maximum post-interaction DOM difference of 2249.
- The site's transport certificate is DV rather than organization-validated or extended-validation TLS.

Summary Verdict

The overall posture is critical and unsuitable for sensitive interaction. The website's professional presentation does not overcome the confirmed external threat detections and blacklist status, while the operator's real-world

identity remains unverified.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present and is a mitigating infrastructure control, but it is not evidence of legitimacy. All four observed addresses were CDN edge addresses, and the origin server was not observable in this analysis; this limits independent hosting attribution and could allow infrastructure-level changes to be obscured.

EVIDENCE

- Infrastructure resolution identified 4 observed IP addresses, all classified as Cloudflare edge addresses.
- The observed edge addresses were associated with AS13335.
- The detected provider was CLOUDFLARENET - Cloudflare, Inc., US.

Closing Assessment

The site should be limited to non-interactive viewing until its operator, authorization, and contact channels have been independently confirmed; login, credential submission, payment, and financial-data use should not proceed beforehand.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.
Behaviour in a sandbox rule:BEHAV_DOM_DIFF_AFTER_INTERACTION
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of optionstraderx.com.

- The request stayed on optionstraderx.com. It was not redirected to another domain. CLEAR
- Registration is published under NAMECHEAP INC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-01-06. NOTED
- The earliest public archive of this site is from 2021-12-19. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about optionstraderx.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
