

Is **oralcamp.com.br** a scam? TrustSniffer's high-risk assessment: **0/100**

oralcamp.com.br

Verdict

0

OUT OF 100

CRITICAL RISK

oralcamp.com.br shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

WHAT THIS SITE APPEARS TO BE

Website for OralCamp dental clinic listing services (implants, prostheses, sedation, esthetic dentistry, root canal, third molar surgery), phone numbers, emails, addresses for Campinas and Sumaré, and appointment booking CTAs (Agendar Avaliação).

Evidence status and limitations

Evidence completeness: **UNKNOWN**

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What oralcamp.com.br served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2017.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website presents itself as OralCamp, a local dental clinic serving Campinas and Sumaré, with information about dental procedures, clinic locations, telephone and messaging contact channels, and appointment-booking calls to action. Its apparent business model is the provision of fee-based clinical dental services rather than financial, investment, or cryptocurrency activity.

Scam/Impersonation Risk

The site content is internally coherent with a dental-clinic presentation: the homepage describes dental services, identifies local operating locations, and does not expose a login form, credential-collection workflow, wallet connection, or other obvious phishing mechanism. However, this benign page profile is materially contradicted by **confirmed blacklist status and multiple external malicious detections**, including detections from several established security providers. The available evidence does not establish a brand-impersonation or conflicting-legal-identity finding, but the external threat evidence is sufficiently serious that the website should be treated as

unsuitable for credentials, personal or medical information, or payment activity pending independent resolution.

Evidence:

- The homepage is categorized as a dental clinic and contains no login form, hidden sensitive form, or untrusted form destination.
- External reputation telemetry records 14 malicious detections, with 0 suspicious detections, and a confirmed blacklist result from 2 external sources.
- The site's transport endpoint returned HTTP 200 successfully in 2 of 2 observed runs, but stable page delivery does not offset the external malicious detections.

Regulatory Verification Notes

The website's stated clinic purpose is clear, but the available material does not independently verify the real-world operator or establish licensing. No license authority or license number is claimed in the reviewed business information, making professional registration and clinic authorization verification necessary before any clinical engagement. The domain itself is long-established, while historical coverage indicates continuity across several years; these are provenance indicators, not proof that the current operator is authorized. Transport security is present, but a domain-validated certificate confirms encryption rather than legal identity or regulatory standing.

Evidence:

- Domain registration telemetry records creation on 2011-06-01 and an age of 15.23 years, with expiry on 2028-06-01.
- Historical telemetry records 151 archive snapshots across 8 tracked years, first seen on 2017-06-26 and last seen on 2024-12-29.
- Hosting telemetry identifies AS51167, CONTABO - Contabo GmbH, DE.
- TLS telemetry identifies issuer YR1, validation level DV, valid to 2026-10-11T17:59:04+00:00.

What to Verify Next

Before booking, disclosing medical information, or making a payment, the clinic and treating professionals should be confirmed through the applicable professional and business registries using contact details obtained independently of the website. The published locations should be checked through an independent map, healthcare directory, or offline contact route, and any payment request should be matched to a verified clinic account rather than an individual or unrelated intermediary. The domain's current blacklist status should also be rechecked by the responsible security or fraud team before access to any patient-facing workflow is permitted.

Evidence:

- The homepage provides two stated locations, Campinas and Sumaré, creating concrete details for independent verification.
- The site uses appointment-booking calls to action but exposes no sensitive form in the observed page.
- The content analysis found no crypto, wallet, or financial-investment functionality, so any later request for such activity would be inconsistent with the stated business purpose.

Summary Verdict

The overall posture is **critical trust risk**. Although the site presents a plausible local-clinic profile and its identity has not been independently verified, the confirmed external threat findings override the otherwise coherent content and technical stability. Sensitive interaction should not be approved on the basis of the website alone.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present and is a mitigating control against direct exposure of the underlying service. The observed edge address was 169.58.6.92 on AS51167; no origin candidate was identified during this analysis. This infrastructure arrangement may improve delivery resilience, but it does not validate the operator or neutralize the external threat findings.

Closing Assessment

Access should remain limited to passive review until independent clinic, practitioner, payment, and domain-reputation checks are completed; credentials, personal or medical information, and payments should not be submitted in the interim.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of oralcamp.com.br.

- The request stayed on oralcamp.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2028-06-01. CLEAR

- The earliest public archive of this site is from 2017-06-26. [CLEAR](#)
- It is hosted on CONTABO, from a server in DE. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [oralcamp.com.br](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
