Full analysis

Overview

Orgean is a UAE-focused construction-materials supplier and manufacturer presenting scaffolding, safety equipment, roofing materials, building-protection products, plywood, manufacturing, trading, and import/export services for contractors and bulk buyers across Dubai, Abu Dhabi, Sharjah, and surrounding markets.

Scam/Impersonation Risk

No contradictions were observed across the site's identity, content, technical, and external-reputation signals. The homepage and About Us content consistently describe Orgean as a construction-supplies business, while the site's Facebook, Instagram, and LinkedIn links provide supporting social-presence signals. The available checks recorded no blacklist hit, phishing indicator, brand-impersonation finding, or page-level fraud red flag. This supports an apparently legitimate, low-risk commercial presentation, although the real-world operator identity remains likely rather than independently verified.

EVIDENCE

- Homepage: identifies Orgean as a UAE construction partner supplying scaffolding, roofing, and safety equipment.
- About Us and service pages: maintain a consistent construction-materials supplier and manufacturer profile.
- Site navigation and linked social profiles: provide 11 internal page links and links to Facebook, Instagram, and LinkedIn.
- Domain registration record: registered 2022-01-24 through GoDaddy.com, LLC; domain age 4.57 years.

Regulatory Verification Notes

The site presents a conventional B2B supplier model rather than a regulated financial service and includes product, service, About Us, and contact/quote pages. No licensing or corporate-registration number is presented in the available site content; for this type of commercial supplier, that is a transparency and verification point rather than evidence of deception. The homepage claim that products are “ISO-Certified” and compliant with UAE construction standards should be treated as an on-site commercial claim pending documentary confirmation. No adverse broker-reputation match was recorded.

EVIDENCE

- Homepage: states “ISO-Certified Products” and describes service coverage in the UAE.
- Contact page: provides a quote/contact form rather than a login or password-collection interface.
- Transport encryption: TLS certificate issued by YE2, DV validation, valid to 2026-10-07.

What to Verify Next

Before a commercial purchase or payment, independently confirm the supplier’s UAE legal registration, the scope and validity of any stated ISO certifications, the contracting entity named on quotations and invoices, delivery and return terms, and payment-protection arrangements. Contact details should be corroborated through an independent business directory, an established social profile, or an offline channel before credentials or payment information are exchanged.

EVIDENCE

- Homepage and About Us pages: identify the business as a UAE construction-materials supplier and manufacturer.
- Products and Services pages: describe scaffolding, safety equipment, roofing, building-protection materials, plywood, manufacturing, and trading.
- Contact page: supports quote requests through one contact form and does not expose a sensitive login form.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust, low-risk posture and no observed scam or impersonation contradictions. The site is suitable for ordinary business

evaluation, subject to normal independent confirmation of the contracting party before credential or payment interactions.

Infrastructure Integrity

The website is protected by AWS CDN/WAF infrastructure, which provides a meaningful mitigation against common service-exposure and abuse patterns but is not, by itself, proof of business legitimacy. Observed infrastructure included CDN edge servers and a potential origin candidate, with no confirmed infrastructure-based threat finding.

EVIDENCE

- Hosting infrastructure: served from AS16509, Amazon.com, Inc. (AMAZON-02), US.
- CDN/WAF: AWS protection observed; edge IPs included 13.248.169.48, 20.204.109.231, 35.154.54.123, and 76.223.54.146.

Closing Assessment

The appropriate course is normal commercial engagement with independent checks of the contracting entity, product claims, delivery terms, and payment protections completed before material commitments.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about orgean.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
