Full analysis

Overview

A Russian-language online retailer for motorcycle equipment and accessories, Ortan presents catalogue categories, product sales, delivery and payment options, contact information, and physical-address details, with an apparent business model centered on direct e-commerce and wholesale supply.

Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no confirmed phishing, impersonation, malicious-content, or blacklist finding. The homepage presents a coherent retail proposition covering motorcycle gear, helmets, jackets, accessories, delivery, payment, and wholesale supply, while the contact and address information is consistent with an ordinary merchant site. A separate name-similarity signal associated the domain with "rt.ru," but the underlying attribution describes this as a variant similarity rather than confirmed brand impersonation; it therefore does not establish an identity conflict.

EVIDENCE

- The homepage is classified as an online retail shop and contains catalogue, delivery, payment, contact, and address content.
- The site's technical reputation checks report no confirmed malicious or blacklist finding, and the broker-reputation dataset records no match.
- Domain registration: 2019-02-18 (~7.51 years old).
- Web-archive coverage: 91 snapshots spanning 2013–2026 (14 years tracked).

Regulatory Verification Notes

The website appears consistent with an established commercial retailer, but the real-world operator remains independently unverified. The reviewed commercial content does not present a license or registration number; for a general motorcycle-equipment retailer, this is a transparency and merchant-verification point rather than evidence of a scam. The site's payment references include cash, card, invoice, and occasional installment arrangements, so the relevant checks concern merchant identity, contractual terms, returns, and payment protections rather than investment or financial-product authorization.

EVIDENCE

- The homepage identifies the business as a motorcycle-equipment and accessory retailer and publishes contact phones and physical addresses.
- The site's transport encryption uses a valid DV certificate issued by YR2, with validity through 2026-09-26 10:12:45 UTC.
- Domain registration is recorded through RU-CENTER-RU, with an expiration date of 2027-02-18 08:38:11Z.
- The reviewed content contains no stated license authority or license number.

What to Verify Next

Before credential or payment interactions, an independent check should connect the merchant name and published address to a reliable business record or offline contact route. The applicable delivery, returns, warranty, installment, and payment-protection terms should be reviewed before an order is placed, and the payment method should provide dispute or chargeback recourse. Any claim of official distribution should be confirmed through the relevant manufacturer or brand's own channel.

EVIDENCE

- The homepage provides the merchant's stated contact and address details for independent comparison.
- The delivery and payment content identifies the transaction methods that require review before purchase.
- The product pages and seller-description content contain the official-distributor claim that should be independently corroborated.

Summary Verdict

The overall posture is high trust and low risk, and the available evidence is consistent with an established, apparently legitimate website. The conclusion supports ordinary browsing and normal retail interaction, while the operator’s real-world identity remains unproven by independent evidence.

Infrastructure Integrity

The site is hosted directly on REG.RU infrastructure in Russia, without a detected CDN or WAF layer; this is a conventional direct-hosting arrangement and is not, by itself, evidence of malicious activity. The absence of an edge-protection layer means there is less intermediary shielding than in a proxied deployment, but the infrastructure posture does not create a contradiction to the broader assessment.

EVIDENCE

- Hosting resolves through AS197695, AS-REGRU – Domain names registrar REG.RU, Ltd, RU; country: RU.
- Infrastructure resolution identifies 3 IP addresses, all treated as likely origin addresses, with 0 edge IPs and no detected CDN.

Closing Assessment

Proceed with ordinary independent merchant-identity, return-policy, and payment-protection checks before submitting credentials or completing a purchase; no elevated restriction on routine site use is indicated by the available evidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about orton.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
