

Is ossbali.com legit? TrustSniffer's high-trust assessment: 80/100

ossbali.com

Verdict

80

OUT OF 100

HIGH TRUST

ossbali.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 75%.

What this site appears to be

OSSBali website describing wood products, woodworking services, construction/project management for villas in Bali, with contact details and company address. No forms or financial transaction interfaces detected.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2007.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

OSSBali is a corporate/local-business website presenting timber products, custom woodwork manufacturing, and construction project-management services for villas and local projects in Bali, with a project portfolio, environmental sourcing statements, contact details, and a business address; its apparent commercial model is contract work, product sales, and project-management fees.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent local construction and woodworking business rather than a financial, investment, or credential-harvesting service: its pages describe legally sourced timber, kiln-dried Grade A wood, woodworking production, construction-management services, and completed villa-related projects. The contact and project content is consistent with that stated business model, and external reputation checks found no malicious, suspicious, phishing, or impersonation indication. The real-world operator remains independently unverified, so the apparent legitimacy of the website should not be treated as proof of a particular legal entity.

EVIDENCE

- The homepage describes timber production, woodworking, villa construction support, legally logged timber, kiln-dried Grade A wood, and professional machinery.
- The project pages identify Villa Jembar Lawang, Club Med, Show Villas, Saba Villas, Padang Padang, Villa Laut, Villa Bahagia Park, Villa Indah, Villa Mandalay, and Villa Bumahan.
- The contact page provides contact details and a company address; no login, payment, or sensitive-data form was detected on the captured site.
- External reputation checks recorded no malicious or suspicious classification, and no broker-dataset match was present.

Regulatory Verification Notes

The website operates as a construction, wood-products, and project-management business and does not claim a financial or other regulated licence in the supplied content. That is a transparency point for ordinary commercial due diligence rather than evidence of a scam. The available About and Contact content supplies business context and contact information, but the operator's real-world identity is not independently verified. Registration continuity, substantial historical web presence, valid transport encryption, and a named registrar provide affirmative evidence that the domain is established, while the absence of independently confirmed legal-entity or licensing information means merchant identity and any sector-specific authorisations should remain subject to normal verification.

EVIDENCE

- The domain was registered through PDR Ltd. d/b/a PublicDomainRegistry.com; registration date: 2006-07-10; age: 20.13 years; expiry: 2027-07-10.
- Web-archive coverage records 679 snapshots from 2007-05-04 through 2025-07-12, spanning 19 years.
- The site's transport encryption uses a DV certificate issued by YR1, valid through 2026-10-24.
- The site's About, service, project, and Contact pages describe the commercial activity and provide business-location context, but no licence number or licensing authority is stated.

What to Verify Next

Before entering into a contract or making a payment, an organization should independently confirm the operating entity behind OSSBali, validate any applicable Indonesian or local construction and business registrations with the relevant authority, and obtain written terms covering scope, milestones, warranties, delivery, cancellation, and dispute handling. Payment arrangements should use a method offering appropriate commercial protection, with account and payment details confirmed through an independently sourced contact route rather than relying solely on information supplied by the website.

EVIDENCE

- The Contact page supplies the starting point for confirming the business address and contact channels through an independent route.
- The Project Management pages define the advertised service scope and should be matched against any proposed statement of work.
- The Wood and Woodworks pages describe the products, sourcing, and quality claims that should be reflected in quotations and contractual specifications.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a low-risk commercial profile and no observed scam or impersonation contradiction. The site's long operational continuity, coherent business content, clean external reputation, and stable technical presentation support a high-trust posture, although operator identity is not independently verified.

Infrastructure Integrity

The site resolves directly to infrastructure operated by Oracle Corporation in the United States, with no CDN or WAF identified and one likely origin address observed. Direct hosting is not inherently adverse; the confirmed ASN and stable resolution provide a clear technical hosting posture, while the site's valid DV TLS certificate provides transport protection but does not independently establish business identity.

Closing Assessment

Ordinary commercial engagement may proceed proportionately, provided the contracting entity, service terms, and payment protections are confirmed through independent business checks before credentials or payment details are exchanged.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ossbali.com.

- The request stayed on ossbali.com. It was not redirected to another domain. CLEAR

- Registration is published under PDR Ltd. d/b/a PublicDomainRegistry.com. CLEAR
- DNS for this domain is served by geraihosting.com, across 2 name servers. NOTED
- The registration is paid up to 2027-07-10. NOTED
- The earliest public archive of this site is from 2007-05-04. CLEAR
- It is hosted on ORACLE-BMC-31898, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ossbali.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
