

Is otconline.in safe? TrustSniffer's low-trust assessment: 40/100

otconline.in

Verdict

40

OUT OF 100

LOW TRUST

otconline.in is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

Om Technology Centre (OTC) site with company history, shop, policies, quote/request features, and account login. Appears to be a standard small-business e-commerce presence built on WordPress.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

The page as captured

https://otconline.in/

Our origins began in the year of 1996.

What otconline.in served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website presents itself as Om Technology Centre (OTC), a small-business online retailer offering electronic components, hobby kits, DIY-related goods, quotations, and customer orders through a WordPress shop and account system. Its apparent business model is conventional e-commerce rather than investment or financial services.

Scam/Impersonation Risk

The supplied page content does not identify an identity inconsistency or brand-impersonation pattern, and the site presents a conventional retail proposition. However, external threat intelligence recorded confirmed blacklist listings from two sources, including three malicious and one suspicious detection, which is a material contradiction to the otherwise ordinary storefront presentation. The account login and registration functionality create a sensitive interaction surface; consequently, credentials and transactional activity should not be treated as routine merely because the pages appear commercially standard.

EVIDENCE

- The homepage and shop presentation describe online retail of electronic components, hobby kits, and related goods, with no investment or cryptocurrency features identified.
- External reputation checks recorded 3 malicious and 1 suspicious detections, with `external\_blacklist` set to true.
- The domain was registered on 2012-10-20 and is approximately 13.84 years old; archive records cover 74 snapshots from 2013 through 2026 across 14 years.
- The account area includes login and registration forms, while the site also provides quotation and order functionality.

Regulatory Verification Notes

The “Our Chronicle” page claims origins in 1996, a rebranding as Om Technology Centre in 2006, and supply relationships involving government, police, educational institutions, and frontline workers. These are on-site claims and do not independently verify the real-world operator. The legal and disclosure position remains unclear: the supplied pages include privacy and refund policies, but no licensing authority or registration number is disclosed. This is a verification gap rather than, by itself, proof of fraud. The domain registrar is Hosting Concepts B.V. dba Openprovider, and the transport certificate is valid but domain-validated only.

EVIDENCE

- The “Our Chronicle” page states that the business began as Om Electronics in 1996 and became OTC in 2006.
- The privacy and refund/returns policy pages are present, but the supplied content does not show a licensing authority or registration number.
- The domain is registered through Hosting Concepts B.V. dba Openprovider.
- Hosting is on AS47583 (AS-HOSTINGER - Hostinger International Limited, CY); TLS uses issuer WR1, DV validation, and is valid to 2026-10-10T16:26:59+00:00.

What to Verify Next

Before any sensitive interaction, an independent source should confirm the legal entity operating OTC, its physical trading presence, and the beneficiary of any payment. Where the transaction or product category requires formal authorization, the relevant Indian corporate, consumer-protection, or sector registry should be checked directly rather than relying on the website’s historical claims. Contact channels and refund terms should also be confirmed through an independently obtained business record, and any payment should use a method offering purchaser protection.

EVIDENCE

- The “Our Chronicle” page contains historical and institutional-supply claims that require external corroboration.
- The privacy and refund/returns pages provide a basis for checking whether the stated contracting party, refund process, and dispute route are sufficiently specific.
- The account, quotation, and order functions indicate that identity and payment details may be requested during ordinary site use.

Summary Verdict

The site has a **low-trust posture with sensitive-interaction risk**. Its conventional retail content and long registration continuity do not overcome the confirmed external reputation contradictions, and the available evidence does not independently verify the operator’s identity.

Infrastructure Integrity

A CDN/WAF protection layer is present, which can mitigate direct exposure and absorb some malicious traffic, but protective infrastructure is not proof of legitimacy. The observed infrastructure includes CDN edge servers and potential origin candidates, so the protection should be treated as a technical control rather than an assurance of site ownership or trustworthiness.

Closing Assessment

Passive viewing may be acceptable for research, but login, credential submission, payment, and account-based transactions should be deferred until the operator and transaction protections have been independently validated.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of otconline.in.

- The request stayed on otconline.in. It was not redirected to another domain. CLEAR
- Registration is published under Hosting Concepts B.V. dba Openprovider. CLEAR
- DNS for this domain is served by dns-parking.com, across 2 name servers. NOTED
- The registration is paid up to 2028-10-20. CLEAR
- The earliest public archive of this site is from 2013-04-22. CLEAR
- It is hosted on AS-HOSTINGER, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about otconline.in at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
