Full analysis

Overview

Outdoor Freestyle is a small Ecuador-based ecommerce website presenting sports and outdoor accessories for sale, including polarized glasses, electronic accessories, grills and utensils, visual-protection products, sportswear, hats and caps, with revenue apparently derived from product sales and national shipping.

Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no phishing, impersonation, malicious-content, or confirmed blacklist indicators, and the site's content contains no visible investment solicitation, credential-harvesting mechanism, wallet connection, or explicit payment flow. The homepage provides a coherent retail presentation, links to "Nosotros," contact, privacy, and terms pages, and identifies a Guayaquil address, telephone number, social channels, and product catalogue. Technical interaction testing did produce some irregularities, including significant post-interaction document changes, console errors, and two non-whitelisted external requests; however, no hidden forms, password submissions, wallet-drainer activity, clipboard

manipulation, or cloaking were detected. These observations support operational caution rather than a finding of fraud. Evidence:

- The homepage and shop content describe an outdoor-goods retailer and show product listings, including “Gafas Polarizadas Dubery, RAYS.” priced at \$22.00.
- The site’s behavioral activity included 8 console errors, a maximum post-interaction DOM difference of 1,491, and 2 non-whitelisted external requests across 2 successful runs; no hidden forms or wallet activity were detected.
- The domain was registered on 2021-02-03 and is 5.55 years old, based on registration records.

Regulatory Verification Notes

The site presents itself as a conventional retail business rather than a financial, investment, or otherwise regulated service. Its identity disclosures are directionally consistent across the homepage, “Nosotros,” and contact material, which identify “Outdoor Freestyle,” a Guayaquil location, telephone contact, and links to privacy and terms pages. The real-world operator is therefore **likely associated** with the site, but the available evidence does not independently verify that identity. No regulated license or registration number is claimed on the reviewed pages; for this retail model, that is a transparency item to confirm rather than evidence of a scam. The domain is registered through .ec DOMINIOS ECUADOR, and the transport layer uses a valid domain-validated certificate issued by YR1. Evidence:

- The homepage footer identifies Ciud. Miraflores, Calle 2da #402 y Av. Principal, Guayaquil, Ecuador, and links to privacy and terms pages.
- Registration records list .ec DOMINIOS ECUADOR as registrar, with creation date 2021-02-03T17:09:36Z and expiration date 2027-02-03T17:09:37Z.
- The site is served from AS63949, identified as AKAMAI-LINODE-AP - Akamai Connected Cloud, SG.
- The TLS certificate is issued by YR1, uses DV validation, and is valid to 2026-10-21T06:08:14+00:00.

What to Verify Next

Before a high-value purchase or submission of sensitive information, the prospective counterparty should confirm that the Guayaquil address and telephone details correspond to the trading business, review the site’s delivery, returns, privacy, and terms provisions, and use a payment method offering transaction protection. Any required Ecuadorian commercial or consumer-registration details should be checked through the relevant official registry, and contact channels should be confirmed through an independent route rather than relying solely on the website.

EVIDENCE

- The homepage provides a physical address, telephone number, social links, and a newsletter form.
- The reviewed form activity consisted of one email-subscription/contact form, with no sensitive form or untrusted submission destination detected.
- The site exposes dedicated “Políticas de privacidad” and “Términos & Condiciones” pages for review.

Summary Verdict

The website presents a **moderate-trust, apparently legitimate retail posture** with no observed scam or impersonation contradictions. Its coherent ecommerce content, established registration continuity, stable

technical operation, and basic business-contact disclosures support ordinary browsing and routine retail consideration, while the available evidence does not independently prove the operator’s real-world identity.

Infrastructure Integrity

The site is protected by Akamai CDN/WAF infrastructure, with the observed edge address associated with AS63949 and no origin candidate exposed in the analysis. This provides a mitigating layer against direct origin exposure and some forms of infrastructure abuse, but it is a protective hosting characteristic rather than proof of business legitimacy.

Closing Assessment

Routine, low-value interaction may proceed on a normal basis, while independent business, policy, and payment-protection checks should be completed before high-value purchases or sensitive account activity.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about outdoorfreestyle.com.ec at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
