- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2015.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

OUTMAXSHOP is a Russian online retail storefront offering sports shoes, clothing, accessories, branded goods, promotions, account access, shopping-cart ordering, delivery and returns information, customer reviews, and contact options.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent sportswear retail model, with ordinary categories such as Nike, Adidas, Puma, running footwear, clothing, bags, and accessories, alongside standard promotions and checkout functionality. The supplied reputation checks found no malicious or suspicious detections, and the site shows no phishing, brand-impersonation, cryptocurrency, or financial-deception indicators.

- The homepage identifies OUTMAXSHOP as an online sportswear store with product categories, branded merchandise, promotions, login, cart, and ordering functions.
- The domain was registered on 2014-11-13 and is approximately 11.72 years old.
- Archived site activity includes 526 snapshots spanning 2015–2026, covering 12 tracked years.

Regulatory Verification Notes

The site supports a conventional consumer-retail business model and provides delivery, returns, reviews, and contact pathways. No regulated financial-service license is claimed, which is consistent with the apparent retail purpose; any corporate or consumer-law disclosures should nevertheless be assessed according to the jurisdiction governing a purchase. The available third-party broker context contains no matching warning.

- The homepage publishes the retail product range, ordering flow, delivery information, returns information, and customer-review areas.
- The domain registrar is REGRU-RU.
- The site is served through AS197695, identified as AS-REGRU - _Domain names registrar REG.RU_, Ltd, RU.
- TLS uses GlobalSign GCC R6 AlphaSSL CA 2025 with DV validation, valid to 2027-01-10.

What to Verify Next

Before a commercial purchase, confirm the seller's legal and consumer-protection details on the relevant policy or terms pages and verify that payment, delivery, and return conditions match the selected order. For higher-value transactions, confirm official support and contact channels through an independent route.

- The storefront exposes delivery and return information relevant to transaction verification.
- Account login, checkout, and contact functions are present on the site.

- The site's published retail policies provide the appropriate locations for confirming purchase terms.

Summary Verdict

OUTMAXSHOP presents as a legitimate, established, and trustworthy ecommerce website with a coherent retail identity, sustained historical presence, clean external reputation, and no observed contradiction or impersonation signal. Normal browsing, account login, ordering, and standard use are appropriate.

Infrastructure Integrity

Cloudflare CDN/WAF protection provides a mitigating layer between visitors and the site's origin, while the analysis observed only CDN-edge addressing and no exposed origin candidate. This supports infrastructure resilience but is not, by itself, proof of business legitimacy.

- Cloudflare CDN/WAF protection was detected.
- One observed edge IP was associated with AS197695; no likely origin IP was identified.
- The hosting country was recorded as RU.

Closing Assessment

Prospective purchasers may proceed with ordinary retail use, applying standard checks of order details, payment records, delivery commitments, and return conditions.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about outmaxshop.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
