

Is ovicio.com.br legit? TrustSniffer's high-trust assessment: 90/100

ovicio.com.br

Verdict

90

OUT OF 100

HIGH TRUST

ovicio.com.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

Portuguese-language entertainment blog 'O Vício' featuring news, reviews and guides about movies, TV series, games, anime and comics. Site includes social links, search and newsletter; monetization appears ad/affiliate-based.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2010.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

O Vício is a Portuguese-language editorial entertainment website covering films, television series, games, anime, manga, and comics through news, reviews, guides, quizzes, and related articles; its apparent business model is ad-supported publishing supplemented by sponsored or affiliate content and newsletter activity.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent editorial identity, with consistent entertainment coverage, navigation across films, series, games, anime, and comics, and links to established social platforms. The site does not present login, payment, cryptocurrency, wallet-connection, investment, or other sensitive transaction mechanics, and the observed page-level findings contain no phishing or brand-impersonation indicators. Its long-running, continuous web presence and clean external reputation are consistent with an established content publisher rather than a newly created impersonation site.

EVIDENCE

- The homepage identifies “O Vício” as an entertainment publication and provides sections for films, series, games, anime and manga, and comics.
- The homepage contains social links to Facebook, Instagram, YouTube, TikTok, and Google News, with no login form or hidden sensitive form detected.
- The domain was registered on 2010-09-24 and is approximately 15.89 years old; archival records contain 511 snapshots spanning 2010-10-29 to 2026-07-30 across 17 tracked years.

Regulatory Verification Notes

The available evidence supports an apparently legitimate editorial/media operation, not a regulated financial or transactional service. The site provides About and Contact navigation, but the supplied page evidence does not independently verify the real-world operator behind the publication; this is an identity-verification limitation rather than evidence of deception. No regulated-service license claim or licensing number is indicated, and licensing would not ordinarily be expected for the editorial activity observed. External reputation checks found no malicious or suspicious detections, and the available broker-intelligence context contains no matching record. The site’s established history, substantive content, valid transport encryption, and recognized hosting infrastructure materially support its legitimacy assessment.

EVIDENCE

- The site's About and Contact pages are present in the internal navigation, while the supplied evidence does not independently establish the operator's legal identity.
- The site is served through AS13335 (Cloudflare, Inc.; CLOUDFLARENET, US).
- The TLS certificate is issued by WE1 at DV validation level and is valid to 2026-10-05.
- The homepage title is "O Vício - Animes, Cinema, Séries, Games e Quadrinhos!", and the page contains approximately 3,900 characters of substantive editorial text.

What to Verify Next

Before any credential or payment interaction associated with advertising, affiliate offers, newsletter activity, or third-party links, ordinary independent checks should confirm the responsible merchant or service provider, applicable returns or cancellation terms, and available payment protections. The publication's official contact channels should also be confirmed through an independently obtained source rather than relying solely on an embedded page link.

EVIDENCE

- The homepage contains one search/newsletter form and no sensitive submission form.
- The site's stated activity is editorial publishing, while monetization may include display advertising, sponsored posts, affiliate links, and newsletter activity.
- The homepage links to six internal areas, including About and Contact, providing identifiable locations for basic publisher due diligence.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a low-risk editorial profile. The high-trust posture is supported by converging historical, content, behavioral, reputation, and technical signals, while the real-world operator identity remains likely rather than independently verified.

Infrastructure Integrity

Cloudflare CDN and WAF protection sit in front of the website, and all observed addresses were Cloudflare edge servers rather than directly exposed origin infrastructure. This provides a meaningful mitigation against direct origin exposure and common web abuse, but it is infrastructure protection rather than proof of operator legitimacy.

Closing Assessment

Normal browsing and ordinary editorial use are proportionate to the assessed posture; any credential or payment interaction connected to third-party commercial activity should remain subject to standard independent merchant, policy, and payment-protection checks.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	78%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ovicio.com.br.

- The request stayed on ovicio.com.br. It was not redirected to another domain. [CLEAR](#)
- DNS for this domain is served by cloudflare.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2031-09-24. [CLEAR](#)
- The earliest public archive of this site is from 2010-10-29. [CLEAR](#)
- It is hosted on CLOUDFLARENET, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ovicio.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
