

# Is oxfam.org.uk legit? TrustSniffer's high-trust assessment: 90/100

oxfam.org.uk

## Verdict

90

OUT OF 100

HIGH TRUST

oxfam.org.uk appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 75%.

What this site appears to be

Oxfam GB website page focused on donations, emergency appeals (Colombia Earthquake), campaigns, volunteering, news and how funds are spent. Provides multiple donation options, links to shop, lottery and informational pages about Oxfam's work and governance.

## Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
  - Module-level completeness metadata is unavailable for this legacy report.

## Key findings

---

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1998.
- No flags from the reputation services TrustSniffer consulted at assessment time.

## Full analysis

---

### Overview

The website presents itself as Oxfam GB, a UK charity focused on combating global poverty through humanitarian appeals, campaigns, volunteering, fundraising, news, retail activity, and public donations. Its apparent business model is non-profit charitable engagement, including one-off and recurring donations, emergency appeals, fundraising, and related participation opportunities.

### Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there were no phishing, impersonation, malicious-content, or blacklist findings, and the site's content is coherent with a charity and donation model rather than an investment or financial-return proposition. The homepage presents Oxfam GB branding, poverty and inequality initiatives, emergency appeals, volunteering, campaigns, and donation activity in a consistent manner. The domain also has a long, continuous historical presence and an established traffic footprint, supporting the conclusion that this is an apparently legitimate, established website; however, the real-world operator identity is not independently verified.

#### EVIDENCE

- Homepage: charity-focused content, including the Colombia Earthquake Appeal, poverty and inequality work, campaigns, volunteering, news, and donation options; no phishing or brand-impersonation indicator was identified.
- Domain continuity: age 27.68788501026694 years, with the first recorded historical observation on 1998-12-05T03:33:00Z.
- Historical coverage: 5000 archive snapshots spanning 1998–2024, with 27 years tracked.
- External reputation checks: 0 malicious and 0 suspicious detections, with no blacklist finding reported.

### Regulatory Verification Notes

The available material describes a charitable organisation and references information about Oxfam's work and governance, but it does not independently verify the real-world legal operator. No financial-services license is claimed, which is consistent with the site presenting donation, campaign, retail, and charitable participation services rather than regulated investment products. This is a verification and disclosure point, not evidence of deception; the overall content remains consistent with an established charity website.

#### EVIDENCE

- Homepage: the stated purpose is charitable fundraising and humanitarian engagement, with no claim to provide financial returns or regulated investment services.
- Transport encryption: an OV TLS certificate is issued to OXFAM by GeoTrust TLS RSA CA G1 and is valid to 2026-10-01T23:59:59+00:00.
- Hosting infrastructure: the site is served through Microsoft Corporation's AS8075 infrastructure in the United States.
- Third-party broker-reputation context: no matching broker record was identified.

#### What to Verify Next

Before credential or payment interactions, an organisation should independently confirm the applicable merchant or charitable entity details, review the relevant donation, retail, lottery, and returns terms, and ensure that any payment is processed through the expected protected channel. Official contact routes should also be confirmed through an independent source rather than relying solely on page-level details.

#### EVIDENCE

- Homepage: donation, search, and newsletter forms were observed; no login form or untrusted form destination was identified.
- Homepage: Visa, Mastercard, UnionPay, American Express, JCB, Discover, Diners Club, Maestro, and PayPal payment options are displayed.
- Homepage: social links reference Facebook, Bluesky, LinkedIn, and WhatsApp, providing channels that can be independently cross-checked.

#### Summary Verdict

The overall posture is **high trust and low risk**, and the evidence is consistent with an established, apparently legitimate website. Confidence in the site's legitimacy is strong, while confidence that the website has been independently tied to a specific real-world operator remains qualified rather than proven.

#### Infrastructure Integrity

The website is protected by a CDN/WAF, with the observed address belonging to Microsoft Corporation's AS8075 edge infrastructure; the origin server was not observable in this analysis. This architecture is a mitigating security and exposure-control measure, but it is not proof of legitimacy. The site's transport encryption uses an OV certificate issued by GeoTrust TLS RSA CA G1 to OXFAM, valid through 2026-10-01.

#### Closing Assessment

Normal browsing is proportionate to the assessed posture, while independent checks of entity details, transaction terms, and payment protection should precede credentials or payments.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

#### What the analysis found

---

No rule findings contributed to this verdict.

## Identity verification

|                                  |        |
|----------------------------------|--------|
| Status                           | LIKELY |
| Identity score                   | 76/100 |
| Identity verification confidence | 76%    |

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

## What TrustSniffer observed

First-party facts recorded during the assessment of oxfam.org.uk.

- The request stayed on oxfam.org.uk. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 1998-12-05. CLEAR
- It is hosted on MICROSOFT-CORP-MSN-AS-BLOCK, from a server in US. NOTED

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about oxfam.org.uk at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
