

Is oxilion.nl legit? TrustSniffer's high-trust assessment: 80/100

oxilion.nl

Verdict

80
OUT OF 100

HIGH TRUST

oxilion.nl appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

Official website of Oxilion, a Dutch hosting and domain registration provider. Provides product pages for hosting tiers, domain services, SSL, Microsoft 365, customer support links, company legal details and cookie/privacy notices.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2009.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Oxilion is a Dutch hosting and domain-registration provider offering web hosting, domain services, SSL certificates, Microsoft 365, backups, email services, customer support, and account access. Its apparent business model is subscription-based infrastructure and related digital services for individuals and organizations.

Scam/Impersonation Risk

No contradictions were observed: there were no confirmed blacklist, phishing, malicious-content, or brand-impersonation indicators, and no conflicting legal identities were identified across the available site content. The homepage and related pages present a coherent hosting-provider business model, with product descriptions, contact facilities, support links, legal information, and privacy documentation. A login form is present, but it was not associated with hidden forms, external password submission, cloaking, wallet activity, or credential-harvesting behavior. Automated observation did identify some external requests outside expected allowlists, but this was not accompanied by a high-risk abuse pattern and is not sufficient to establish impersonation or fraud.

EVIDENCE

- The domain was registered on 2008-06-20T10:17:56Z and is 18.15 years old.
- The historical record contains 597 archive snapshots spanning 2009–2026, with 18 years tracked.
- The homepage includes a standard login form, while behavioral observation recorded zero hidden forms, zero external password forms, zero wallet-provider detections, and no cloaking.

Regulatory Verification Notes

The site identifies itself through company information, contact details, an about page, terms, privacy, and cookie notices, which is consistent with a functioning commercial hosting provider. Its pages do not claim a regulated financial-service license or provide a license number; for this type of hosting and domain-registration business, that is a disclosure point to clarify rather than evidence of a scam. The available evidence is consistent with an established, apparently legitimate website, although the real-world operator identity remains likely rather than independently verified.

EVIDENCE

- The site's hosting infrastructure is identified as AS20559, operated by FUNDAMENTS-AS - Fundaments B.V., NL.
- The site uses a valid DV TLS certificate issued by YR1, valid until 2026-09-22T11:04:41+00:00.
- The homepage and linked pages cover hosting, domains, SSL, Microsoft 365, support, company information, privacy, and general terms.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm the merchant identity using contact details obtained through an offline or separately trusted channel. It should also review the applicable service terms, renewal conditions, cancellation and refund provisions, and the payment provider's protection mechanisms; any requirement for regulated licensing should be checked with the relevant Dutch registry.

EVIDENCE

- The site provides dedicated contact and about pages for independent comparison against procurement or supplier records.
- The site publishes general terms, privacy, and cookie documentation that can be reviewed before service activation.
- The site links to customer support and a customer-account area, providing defined channels for operational validation.

Summary Verdict

The overall posture is **high trust and low risk**, with strong evidence of an established and coherent commercial website and no observed scam or impersonation contradictions. Legitimacy is apparent and evidence-consistent, but the operator's real-world identity is not independently proven by the available analysis.

Infrastructure Integrity

The site resolves directly to hosting infrastructure operated by Fundaments B.V. in the Netherlands rather than through a detected CDN or WAF edge layer. Two likely origin addresses were identified; this is an infrastructure characteristic, not an indication of maliciousness, and the transport layer remains protected by the valid certificate noted above.

EVIDENCE

- Infrastructure resolution identified 2 unique IP addresses, with 0 edge IP addresses and 2 likely origin IP addresses.
- No CDN was detected in the observed resolution path.
- The hosting country was identified as NL and the registry as RIPE NCC.

Closing Assessment

Routine browsing and ordinary service evaluation are proportionate to the assessed posture; before submitting credentials or making payments, standard independent merchant-identity, contractual, and payment-protection checks should be completed.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of oxilion.nl.

- The request stayed on oxilion.nl. It was not redirected to another domain. CLEAR
- Registration is published under Oxilion B.V.. CLEAR
- DNS for this domain is served by oxilion.nl, across 3 name servers. NOTED
- The earliest public archive of this site is from 2009-01-20. CLEAR
- It is hosted on FUNDAMENTS-AS, from a server in NL. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about oxilion.nl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
