Full analysis

Overview

This website is an expired, parked domain displaying a registrar-hosted notice that the domain must be renewed before its previous website can be restored. Its visible purpose is currently limited to domain renewal and related hosting, email, VPS, and new-domain sales rather than an operating business or active service.

Scam/Impersonation Risk

The site presents a **critical interaction risk** because the domain is confirmed as blacklisted and has multiple external malicious detections. These signals concern the domain itself and are materially more significant than the benign appearance of the current placeholder page. Separate abuse reports also exist against the hosting IP; those reports are attributed to shared provider infrastructure rather than conclusively to the website, but they remain a relevant corroborating concern. No brand impersonation or phishing form was observed on the currently rendered page, and no active credential or payment form is present; nevertheless, the confirmed blacklist status means the site should not be treated as trustworthy for sensitive interaction.

EVIDENCE

- External reputation assessment recorded a confirmed blacklist status for the domain and 5 malicious detections.
- The homepage is an expired-domain placeholder, not an active business site, and provides no operating-service content.
- The current page contains no login form, sensitive form, wallet connection, or hidden password destination.

Regulatory Verification Notes

The real-world operator remains unverified. The expired placeholder does not identify an operating legal entity, licensing authority, registration number, or regulated-service authorization, creating a material disclosure gap if the domain is later presented as a commercial or financial service. The domain's apparent ownership and governance cannot therefore be independently connected to a named operator from the supplied site content. A valid transport certificate confirms encrypted transport only; it does not establish ownership, licensing, or legitimacy.

EVIDENCE

- WHOIS records show registration on 2025-08-05, with an age of 1.04 years and expiry on 2027-08-05.
- The site's visible content states that the domain is expired and directs the owner to renew it through a Hostinger account.
- TLS uses issuer YE2 with DV validation and is valid until 2026-10-31.
- No license claim, license authority, or license number is presented in the available site content.

What to Verify Next

Before any future engagement, the domain's ownership should be confirmed through an independent registrar or documented business contact rather than through links presented on the page. If the domain later offers financial, brokerage, investment, payment, or other regulated services, the claimed operator and authorization should be checked directly against the relevant official registry. Any renewal or account action should be initiated through a known Hostinger channel independently reached, not solely through the domain page.

EVIDENCE

- The homepage offers renewal and new-domain purchase actions while stating that the prior website is unavailable.
- The page provides no active service, legal, or regulatory documentation against which an operator could be validated.
- The site was assessed as having no active sensitive form, reducing the current page's direct interaction surface but not resolving the domain-level reputation findings.

Summary Verdict

The website has a **critical trust posture** and is not suitable for login, credential submission, payment, or other sensitive activity. The available evidence supports treating it as a compromised, misused, or otherwise

unreliable domain rather than as an established operating service.

Infrastructure Integrity

The domain resolves directly to infrastructure operated by AS-HOSTINGER—Hostinger International Limited in Cyprus, with no CDN detected and one likely origin IP identified. Hostinger is a recognizable hosting provider, and the site has valid DV TLS, but provider infrastructure and encrypted transport are mitigating technical details only; neither establishes that the domain operator is legitimate or offsets the external reputation findings.

EVIDENCE

- Served from AS47583, AS-HOSTINGER—Hostinger International Limited, CY.
- Infrastructure resolution identified 1 unique IP, 0 edge IPs, and 1 likely origin IP.
- TLS certificate issuer is YE2, with DV validation and validity through 2026-10-31.

Closing Assessment

The appropriate institutional posture is to avoid sensitive interaction with the domain and to use only independently verified registrar or organizational channels for any necessary follow-up. Any future access should remain limited until ownership, purpose, and applicable authorization have been independently established.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- The page made background requests to destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC
- The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about oyeadventure.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
