

Is ozila.net legit? TrustSniffer's high-trust assessment: 95/100

ozila.net

Verdict

95

OUT OF 100

HIGH TRUST

ozila.net appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

French cultural/literary site (Ozila) listing articles, chronicles and author pages. Content samples show article titles, dates and navigation; no evident financial product, login prompts, or solicitation for funds.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://www.ozila.net/>

What ozila.net served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2012.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

Ozila is a French-language cultural and literary publication presenting articles, chronicles, author pages, and topic sections covering literature, culture, music, politics, science, society, and related editorial subjects; its apparent business model is informational publishing rather than financial services or direct solicitation of funds.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, malicious-content, or conflicting-identity indicators were observed. The site presents ordinary editorial navigation and content, with no login form, sensitive form, wallet interaction, or solicitation for funds. Three abuse reports were associated with the hosting IP, but the attribution is to shared provider infrastructure, carries zero confidence, and was discounted as not site-specific; this is a soft infrastructure-reputation signal rather than evidence of malicious conduct. The domain also shows continuous historical presence without suspicious repurposing, supporting provenance consistency.

EVIDENCE

- The homepage presents dated literary articles, cultural categories, chronicles, author pages, and a contact section, with no financial solicitation or credential prompt.
- The site's behavior recorded zero external posts, zero external XMLHttpRequests, no hidden forms, no password forms, and no wallet-related activity across two successful runs.
- The domain was registered on 2011-08-16 and is 15.02 years old; the historical record contains 84 archive snapshots spanning 2012–2026, covering 15 years.
- Three reports concern shared infrastructure at 217.160.0.148 operated by IONOS SE, with an abuse-confidence score of 0 and attribution discounted because the IP is shared provider infrastructure.

Regulatory Verification Notes

The site is an editorial publication rather than a regulated financial service, so the absence of a financial licence claim is not, by itself, a concern about the apparent business model. The homepage identifies an “A propos” section, author pages, contact navigation, and “Mentions Légales,” but the supplied content does not independently verify the real-world operator behind the publication. Available evidence is therefore consistent with an established, apparently legitimate website while leaving the publisher’s identity independently unverified. The absence of a broker match provides additional neutral contextual support, but it is not a licensing or regulatory determination.

EVIDENCE

- The homepage navigation includes “A propos,” “Contact,” and “Mentions Légales” alongside the publication’s editorial categories.
- Domain registration is through IONOS SE, with creation date 2011-08-16 and expiration date 2027-08-16.
- The site is hosted by IONOS-AS - IONOS SE, DE on AS8560.
- The site uses a DV TLS certificate issued by Sectigo Public Server Authentication CA DV R36, valid through 2026-12-18.

What to Verify Next

Before any credential or payment interaction, an enterprise or prospective user should independently confirm the publisher’s legal identity and operating responsibility through the “A propos” and “Mentions Légales” pages, then validate the contact channels through an independent route. If the site is later used for donations, sponsorships, or another paid arrangement, the applicable entity, payment recipient, refund terms, and payment-protection arrangements should be confirmed separately.

EVIDENCE

- The “A propos” page is the appropriate location for confirming the publication’s stated publisher and editorial responsibility.
- The “Mentions Légales” page should be checked for the legal entity, jurisdiction, and accountable contact details.
- The “Contact” page provides the site’s stated communication route for independent confirmation.
- The supplied page analysis identified no financial-service licence claim or licence number requiring validation.

Summary Verdict

The overall posture is **high trust and low risk**, with strong evidence consistency between the site’s editorial purpose, observed behavior, historical continuity, and technical operation. It should be regarded as an established, apparently legitimate website, while the real-world operator remains independently unverified.

Infrastructure Integrity

The site is protected by CDN/WAF infrastructure, which is a mitigating control that can reduce direct exposure of the service and absorb routine network abuse. The observed infrastructure resolves through IONOS in Germany, with potential origin candidates present; this protection supports technical integrity but does not independently establish the publisher’s identity.

EVIDENCE

- CDN/WAF protection was observed, with 1 edge IP and 2 potential origin candidates resolved.
- The observed edge infrastructure is associated with IONOS-AS - IONOS SE, DE.
- The infrastructure trust assessment recorded the CDN as a trusted protective layer.

Closing Assessment

Ordinary browsing is proportionate to the evidence; before submitting credentials or making payments, independent checks of the publisher, transaction terms, and available payment protections should be completed.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 3 reports on hosting IP 217.160.0.148 (IONOS SE, Content Delivery Network), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100

Identity verification confidence	25%
No on-site identity signals detected	
Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.	
What TrustSniffer observed	
First-party facts recorded during the assessment of ozila.net.	
- The request stayed on ozila.net. It was not redirected to another domain. CLEAR - Registration is published under IONOS SE. CLEAR - DNS for this domain is served by ui-dns.biz, across 4 name servers. NOTED - The registration is paid up to 2027-08-16. NOTED - The earliest public archive of this site is from 2012-02-04. CLEAR - It is hosted on IONOS-AS, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ozila.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
