- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

OZmall (ozmall.co.jp) is a Japanese-language lifestyle, travel, dining, beauty, and events editorial platform that also presents promotional campaigns, coupons, and reservation opportunities, operating as a mainstream media and booking-oriented service.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent OZmall editorial identity, with established lifestyle content and conventional reservation and promotional functionality rather than phishing, cryptocurrency, or other abuse-oriented mechanisms. The visible account and navigation paths do not expose a sensitive form or an untrusted submission destination, and the site does not exhibit brand-impersonation indicators. External reputation checks were clean, with no malicious, suspicious, phishing, or confirmed blacklist findings, supporting the conclusion that normal interaction is appropriate.

EVIDENCE

- The homepage is classified as content/editorial and informational/media, with no reported red flags or brand-impersonation indicators.
- The homepage's login, help, and account-navigation links do not present a detected login form, hidden form, sensitive form, or untrusted destination.
- External reputation assessment recorded 0 malicious and 0 suspicious detections, with no blacklist or phishing result; the domain is within the global top 1,000,000 traffic-ranked sites.

Regulatory Verification Notes

OZmall's visible purpose is media publishing and reservation promotion, not the provision of a financial product or trading service. The available page evidence does not show a claimed license or registration number; this is a limited disclosure and verification point rather than evidence of deception. The site's commercial model—advertising, sponsored content, affiliate or reservation commissions, and promotional campaigns—is consistent with the services presented. No conflicting legal identities or adverse broker-reputation match were identified.

EVIDENCE

- The homepage title and content identify OZmall as an “おでかけメディア” and premium reservation service.
- The domain was registered on 2000-05-18 and is approximately 26.25 years old.
- The site is served from AS396982, Google Cloud Platform / Google LLC, US.
- TLS is provided by issuer WR3 at DV validation level and is valid through 2026-10-21.

What to Verify Next

For a prospective booking or promotion, confirm the final merchant, cancellation conditions, payment flow, and refund terms at the linked reservation destination before completing the transaction. Account-related activity should use the site’s own login and help routes, with any support interaction initiated through channels reached from the official domain.

EVIDENCE

- The homepage provides reservation links, coupons, promotional campaigns, login, help, and account-management paths.
- The homepage links to Instagram profiles associated with OZmall editorial activity.
- The site’s observed business model is informational and reservation-oriented, with no cryptocurrency or wallet-connection functionality detected.

Summary Verdict

The website presents a **high-trust, established legitimacy posture** supported by consistent identity, mature content, clean reputation, and normal browser behavior. No scam, impersonation, phishing, or identity-conflict indicators were observed, and standard interaction is appropriate.

Infrastructure Integrity

The site resolves to Google Cloud Platform infrastructure operated by Google LLC in the United States, using AS396982 and a single observed address; no CDN was detected. Identified mainstream cloud hosting and valid transport encryption provide conventional infrastructure safeguards, although protective hosting remains a mitigating technical factor rather than independent proof of legitimacy.

Closing Assessment

Prospective users may proceed with normal browsing, account login, reservations, and standard account actions, applying ordinary payment and booking controls appropriate to any online service.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ozmall.co.jp.

- The request stayed on ozmall.co.jp. It was not redirected to another domain. CLEAR
- DNS for this domain is served by d-53.info, across 3 name servers. NOTED
- It is hosted on GOOGLE-CLOUD-PLATFORM, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ozmall.co.jp at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
