- Public web-archive history exists since 2020.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

OzonExpress is a Moroccan ecommerce-logistics website presenting parcel collection, nationwide delivery, warehousing, real-time shipment tracking, cash-on-delivery collection, and merchant remittance services, apparently generating revenue through merchant service fees with delivery pricing starting at 20 MAD.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or malicious reputation findings were observed. The domain has a mature, continuous history without evidence of suspicious repurposing, while the homepage's parcel-tracking form showed neither sensitive-data collection nor an untrusted submission destination. This convergence supports the assessment that the site represents an established operating service rather than a deceptive imitation.

- Domain records show registration on 14 March 2019, making the domain approximately 7.38 years old; the registered owner is Imad El Arfaouy and the registrar is ADK MEDIA.
- Web archives contain 412 snapshots spanning 16 March 2020 to 28 July 2026, covering 7 tracked years with no detected semantic drift or suspicious repurposing.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no search-browser safety alert, no reported infrastructure abuse, and inclusion within the top one million globally ranked domains.
- The homepage's single parcel-tracking form was not sensitive, used no untrusted destination, and exhibited no hidden forms, cloaking, suspicious scripts, or credential-harvesting behavior.

Regulatory Verification Notes

The available homepage identifies a commercial logistics proposition but does not make a licensing claim or provide a license number. The supplied evidence does not establish whether a sector-specific authorization is required for its delivery, storage, cash-collection, or merchant-remittance arrangements; this is therefore a regulatory verification matter, not a scam indicator. No adverse broker-profile match was identified, although such third-party coverage is contextual and cannot establish legal status.

- The homepage presents OzonExpress as an ecommerce logistics and delivery provider operating in Morocco, with account registration and login facilities.
- The analyzed content contains no claimed licensing authority, license number, or independently verified license.
- The site is served from AS44803 (WEBDOCK-AS – Webdock.io ApS, DK) in Sweden.

- The site's transport encryption uses a DV TLS certificate issued by YE1, valid until 19 October 2026.

What to Verify Next

Prospective commercial counterparties should obtain the contracting entity's formal registration details, confirm that the signatory and settlement account correspond to that entity, and determine whether its cash-collection and merchant-remittance model requires authorization under the applicable Moroccan framework. Merchant onboarding should also establish written delivery service levels, remittance timing, loss and return liability, data-processing terms, and the permissions granted to platform integrations. Official support and operational contacts should be confirmed through an independent business channel before contractual reliance.

- The homepage advertises guaranteed 24-hour delivery and seven-day service, creating service-level claims that should be reflected in merchant terms.
- The homepage claims a network of more than 900 agencies across Moroccan cities, providing a concrete operational-coverage representation for contractual confirmation.
- The homepage promotes direct Google Sheets integration with automated order-list updates, making access control and data-processing terms relevant to onboarding.
- The homepage describes an AI-assisted service called Ozzy that supplies shipment information and creates complaints for referral to operational teams, warranting clarification of escalation and personal-data handling procedures.

Summary Verdict

OzonExpress presents as a legitimate, established, and trustworthy corporate service website. Its coherent commercial purpose, sustained operating history, clean external reputation, and benign observed behavior converge without material contradiction.

Infrastructure Integrity

The site resolves directly to a single likely origin address and does not use a detected CDN or WAF edge layer. This is a conventional, comparatively simple hosting arrangement; it provides no CDN-based origin shielding, but the observed infrastructure is resolved, stable, and carries no confirmed abuse signal.

Closing Assessment

Normal interaction, including account login, parcel tracking, account actions, and standard use of the service, is appropriate; commercial onboarding should proceed through ordinary counterparty and contract controls proportionate to a logistics provider handling collections and merchant settlements.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ozonexpress.ma.

- The request stayed on ozonexpress.ma. It was not redirected to another domain. CLEAR
- Registration is published under ADK MEDIA. CLEAR
- DNS for this domain is served by ozonserver.com, across 2 name servers. NOTED
- The registration is paid up to 2030-03-14. CLEAR
- The earliest public archive of this site is from 2020-03-16. CLEAR
- It is hosted on WEBDOCK-AS, from a server in SE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ozonexpress.ma at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
