

Is p-chem.gr legit? TrustSniffer's high-trust assessment: 80/100

p-chem.gr

Verdict

80

OUT OF 100

HIGH TRUST

p-chem.gr appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Greek-language ecommerce site (p-chem.gr) selling paints, fillers, varnishes and related tools. Contains product listings, contact phone/email, shipping/payment info, cookie disclosure and ecommerce account/login links.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What p-chem.gr served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2004.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

p-chem.gr is a Greek-language online retail storefront for automotive paints, fillers, primers, varnishes, polishing materials, body-shop tools, and related products, serving customers in Greece through product sales, shipping, customer accounts, and standard ecommerce payment flows.

Scam/Impersonation Risk

No confirmed phishing, impersonation, blacklist, or conflicting-identity indicators were observed. The site presents a coherent retail function, publishes ordinary ecommerce content, and shows no page-level fraud flags. One external reputation check returned a single malicious classification, but this was not corroborated by the other evaluated reputation indicators, which reported no suspicious result, no Google Safe Browsing malicious status, and no blacklist match. A page-level heuristic also noted a superficial resemblance to the infrastructure domain he.net; this was not treated as confirmed brand impersonation and is inconsistent with the site's Greek retail content. The available evidence therefore supports an apparently legitimate, low-risk storefront, while not independently proving the real-world operator's identity.

EVIDENCE

- The homepage presents product catalogues, customer account and login functions, delivery across Greece, payment information, telephone contact, and customer feedback features.
- External reputation results recorded `vt\_malicious: 1`, `vt\_suspicious: 0`, `gsb\_malicious: false`, and `external\_blacklist: false`; no abuse reports were recorded.
- The domain has an authoritative age of 22.55 years; the archive record reports 0 snapshots, with first seen 2004-01-30 and last seen 2024-10-01, across 21 years tracked.

Regulatory Verification Notes

The site provides typical ecommerce disclosures and operational information, including contact details, shipping and payment information, cookie and privacy notices, and policy pages. No regulated financial-service activity is indicated, and no licensing claim or license number is identified in the supplied site evidence. This is a transparency item for ordinary merchant verification rather than evidence of a scam. The available identity linkage is plausible but not independently verified, so on-site business claims should not be treated as conclusive proof of the operating legal entity. The use of domain-validated transport encryption confirms secure certificate issuance, but does not independently validate the merchant's corporate identity.

EVIDENCE

- The homepage and ecommerce content include contact information, payment and shipping information, cookie disclosure, privacy-related notices, and account functionality.
- The site's hosting infrastructure is served from AS24940, HETZNER-AS — Hetzner Online GmbH, Germany.
- The site's TLS certificate is issued by Sectigo Public Server Authentication CA DV R36, uses DV validation, and is valid to 2026-09-05T23:59:59+00:00.

What to Verify Next

Before credential or payment interactions, an independent check should confirm the merchant's legal name and contact details through an offline or independently sourced business channel. Any applicable Greek commercial-registration or sector-specific requirements should be checked with the relevant official registry, and the published return, delivery, refund, and payment-protection terms should be reviewed before placing a material order. Account access should use a unique password, and payment methods with suitable dispute or chargeback protections are preferable.

EVIDENCE

- The site contains a login/account form and a separate cookie-consent form; no sensitive form destination outside the site was identified.
- The ecommerce pages describe shipping and payment arrangements and provide a telephone contact channel for customer questions.
- The site links to Facebook, providing one independently observable social-presence reference for comparison with the merchant information.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate ecommerce website and supports a high-trust, low-risk posture. No confirmed scam or impersonation contradiction was observed, but the operator's real-world identity remains likely rather than independently verified.

Infrastructure Integrity

The website is protected by a CDN/WAF layer, with the observed edge address 148.251.145.30 associated with AS24940 and Hetzner Online GmbH; no origin-server candidate was observable in this analysis. This infrastructure provides a useful exposure-mitigation control, but it is not proof of merchant legitimacy.

Closing Assessment

Normal browsing is proportionate, while independent merchant-identity, returns, and payment-protection checks should be completed before submitting credentials or committing funds.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of p-chem.gr.

- The request stayed on p-chem.gr. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2004-01-30. CLEAR
- It is hosted on HETZNER-AS, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about p-chem.gr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
