

Is pachafloripa.com.br legit? TrustSniffer's high-trust assessment: 95/100

pachafloripa.com.br

Verdict

95

OUT OF 100

HIGH TRUST

pachafloripa.com.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

Local news and travel magazine page focused on Florianópolis with multiple articles, subscription prompts, newsletters, and editorial content. No obvious financial investment offering or credential-harvesting behavior detected.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2008.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Pacha Floripa is a Portuguese-language local news and travel magazine focused on Florianópolis, presenting travel guidance, national news, sports, opinion, video, audio, newsletters, and subscription-based digital content supported by advertising and premium plans.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent editorial publication rather than an investment, cryptocurrency, gambling, or credential-harvesting service; observed functionality included newsletter and subscription options but no sensitive login form, hidden form, wallet connection, or suspicious external password submission. External reputation checks found no malicious or suspicious detections, no blacklist result, no abuse reports, and no indication of brand impersonation. The available evidence is therefore consistent with a low scam and impersonation risk, while the real-world operator remains independently unverified.

EVIDENCE

- The homepage identifies the publication as “Pacha Floripa” and displays articles across travel, news, sports, opinion, video, audio, and newsletters.
- The homepage contained one newsletter or subscription form and no sensitive form, hidden form, external password submission, or wallet-related behavior.
- Observed behavioral testing recorded no cloaking, clipboard manipulation, wallet-drainer activity, suspicious inline scripts, or hidden forms.
- The domain's historical record shows 140 archive snapshots spanning 2008–2025, with 18 years tracked and no detected repurposing or semantic category drift.

Regulatory Verification Notes

The site appears to operate as an editorial media and travel publication, with revenue indications involving subscriptions, advertising, newsletters, and premium digital plans rather than a regulated financial service. No financial license claim or license number is presented in the supplied content; this is a transparency item for commercial due diligence, not evidence of deception. The identity evidence supports an established-site assessment but does not independently verify the legal operator. The available third-party broker dataset returned no match, which is a contextual reputational signal rather than a licensing or regulatory determination.

EVIDENCE

- The homepage offers a subscription prompt advertising a digital plan at R\$1 per week and provides newsletter signup functionality.
- The homepage is classified as News / Media and contains substantial editorial text and multiple named articles rather than financial-service acquisition content.
- The domain registration record gives a creation date of 2026-03-18 and an expiry date of 2027-03-18; historical archive evidence independently places the domain's established continuity at approximately 17.916 years, first observed on 2008-09-20.
- The site is served from AS13335 (CLOUDFLARENET - Cloudflare, Inc., US); its TLS certificate is issued by WE1 at DV validation level and is valid to 2026-11-14.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm the merchant or publisher identity, review the applicable subscription, cancellation, refund, and renewal terms, and ensure that payment protections are available. Contact channels should be confirmed through an independent route, and any claimed corporate or regulatory status should be checked against the relevant official registry where applicable.

EVIDENCE

- The homepage exposes “Entrar,” “Assine,” “Conta,” and newsletter functions, creating a conventional account and subscription interaction surface.
- The supplied content identifies editorial and premium-plan monetization but does not provide a verified legal-entity or licensing reference.
- Behavioral testing completed two successful runs and found no external non-whitelisted XHR activity, password-external forms, or wallet-provider detection.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. No scam, phishing, impersonation, or conflicting-identity indicators were observed, although the operator’s real-world identity is not independently verified.

Infrastructure Integrity

Cloudflare CDN and WAF protection front the website, and all observed addresses were CDN edge servers rather than identified origin infrastructure. This reduces direct exposure of the hosting origin and is a mitigating technical control, but it is not independent proof of the operator’s legitimacy.

EVIDENCE

- Four observed edge addresses were associated with AS13335; no likely origin IP candidate was identified.
- Cloudflare was identified as the hosting and CDN provider, with the infrastructure registered in the United States through ARIN.

Closing Assessment

Normal browsing and ordinary editorial use are proportionate to the available evidence; account or payment activity should proceed only after the routine merchant-identity, terms, and payment-protection checks are completed.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of pachafloripa.com.br.

- The request stayed on pachafloripa.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-03-18. NOTED
- The earliest public archive of this site is from 2008-09-20. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about pachafloripa.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
