

Is paciencia.co legit? TrustSniffer's high-trust assessment: 75/100

paciencia.co

Verdict

75

OUT OF 100

HIGH TRUST

paciencia.co appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 55%.

What this site appears to be

A multilingual casual solitaire/games website (Paciencia.co) offering many Solitaire variants and Freecell games, with user registration/login, leaderboards, cookie consent details and analytics; monetized by ads.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Paciencia.co is a multilingual casual-games website offering free Solitaire, Spider Solitaire, Freecell, and related card and board games, supported primarily by advertising with optional user accounts, statistics, daily challenges, and leaderboards.

Scam/Impersonation Risk

No contradictions were observed. The site's content is coherent with a casual-games service, and no phishing, brand-impersonation, malicious, or blacklist indicators were identified. Behavioral testing recorded third-party network activity, but the detailed interpretation treated the associated scripts and requests as consistent with ordinary advertising and analytics rather than malicious activity; no cloaking, hidden forms, wallet activity, or credential-exfiltration behavior was detected. The domain's long registration history and established traffic footprint further support an apparently established site, although the real-world operator remains independently unverified.

EVIDENCE

- The domain registration record shows creation on 2016-11-25 and an age of approximately 9.72 years.
- Evaluated reputation checks returned 0 malicious and 0 suspicious detections; no external blacklist or impersonation match was recorded.
- The homepage is categorized as casual games and entertainment, with no red flags identified in its page content.

Regulatory Verification Notes

The available site content describes free entertainment services rather than a regulated financial or investment activity, and it makes no licensing claim requiring financial-regulatory validation. Operator identity is not independently verified by the available evidence, so the site's apparent legitimacy should not be treated as proof of a particular legal entity. Registration through GoDaddy.com, LLC, valid transport encryption, clean external reputation, and an established web presence provide affirmative legitimacy context. No third-party broker match was identified.

EVIDENCE

- The domain registrar is GoDaddy.com, LLC.
- The site is served from AS16509, Amazon.com, Inc., US.
- The site's TLS certificate is issued by Amazon RSA 2048 M04, uses DV validation, and is valid through 2027-02-10.

What to Verify Next

Before creating an account, the prospective user should confirm that the site's independently obtained contact channels correspond to the same service and should review the privacy, cookie, and account terms governing analytics and advertising. Where any paid feature or payment interaction is introduced, ordinary checks of the responsible merchant identity, refund or return terms, and available payment protection should be completed first; account credentials should also be unique to this service.

EVIDENCE

- The homepage provides registration and login functions, while no sensitive form destination or hidden form was detected.
- Cookie-consent information and analytics disclosures are presented on the site.
- A social-presence link to Facebook is available as a potential channel for independent contact verification.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust, low-risk posture and no observed scam or impersonation contradictions. The principal qualification is that the real-world operator identity is likely but not independently verified.

Infrastructure Integrity

The site is protected by AWS CloudFront CDN/WAF infrastructure, and all observed addresses were CDN edge addresses rather than directly exposed origin candidates. This provides a meaningful mitigation against straightforward origin exposure and supports infrastructure integrity, but it is not proof of operator legitimacy.

Closing Assessment

Ordinary browsing is proportionate to the assessed posture; account or payment interactions should proceed only after the routine independent identity, terms, and payment-protection checks described above.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100

Identity verification confidence	37%
----------------------------------	-----

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of [paciencia.co](#).

- The request stayed on [paciencia.co](#). It was not redirected to another domain. CLEAR
- Registration is published under [GoDaddy.com, LLC](#). CLEAR
- DNS for this domain is served by [awsdns-28.net](#), across 4 name servers. NOTED
- The registration is paid up to 2026-11-24. NOTED
- It is hosted on [AMAZON-02](#), from a server in [US](#). NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [paciencia.co](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
