

Is packssrl.com.ar a scam? TrustSniffer's high-risk assessment: 0/100

packssrl.com.ar

Verdict

0

OUT OF 100

CRITICAL RISK

packssrl.com.ar shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-22 by automated analysis. Classification confidence 55%.

What this site appears to be

Simple server directory listing (Index of /) with file names, last modified timestamps, sizes, and descriptions. No forms, login, or monetization present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	14 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	0 reports AbuseIPDB; shared hosting inflates this count	NOTED
Domain age	4.7 years old Registered history	CLEAR
Web archive	Archived since 2021 Public history exists	CLEAR
Certificate	Encrypted connection Issued by YR2	NOTED

The page as captured

https://packssrl.com.ar/

What packssrl.com.ar served when TrustSniffer captured it on 2026-08-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website at packssrl.com.ar currently presents an auto-generated “Index of /” server directory rather than a developed public service, business, or customer-facing application. Visitors are shown filenames, modification timestamps, sizes, and descriptions, with no apparent monetization, account workflow, or stated operating purpose.

Scam/Impersonation Risk

Confirmed external reputation contradictions materially outweigh the otherwise passive presentation.

The domain is blacklisted by the evaluated external sources, with 14 malicious detections and Tier-1 detections associated with Fortinet and Sophos. The homepage itself does not display a login or payment mechanism, and no brand impersonation or conflicting legal identity is evidenced in the supplied page content; however, the absence of an active interaction surface does not neutralize the external malicious findings. The operator identity also remains unverified, so the site cannot be attributed confidently to a legitimate real-world entity.

EVIDENCE

- The homepage is an auto-generated “Index of /” directory containing only 57 characters of DOM text and no forms, login fields, or payment requests.
- External reputation assessment recorded 14 malicious detections, 0 suspicious detections, and 2 Tier-1 flagged vendors: Fortinet and Sophos.
- Domain registration continuity indicates approximately 4.67 years of age; archival coverage records 22 snapshots spanning 2021–2025, with 5 years tracked.

Regulatory Verification Notes

The observed site does not provide a substantive legal, corporate, licensing, or regulated-service disclosure. No license claim, license authority, or license number is presented, and the available content is insufficient to establish who operates the domain or what lawful business activity, if any, it conducts. The valid transport certificate and identifiable hosting environment are technical properties only; they do not establish licensing, ownership, or regulatory standing. No matching third-party broker signal was identified, but that absence is not a regulatory determination.

EVIDENCE

- The homepage contains no company description, terms, privacy notice, licensing statement, registration number, or regulated-entity disclosure.
- The site is served from AS29802, HVC-AS – HIVELOCITY, Inc., US.
- TLS is issued by YR2 at DV validation level and is valid to 2026-10-05T07:24:06+00:00.

What to Verify Next

Any proposed engagement should first be suspended pending independent confirmation of the operator and the intended purpose of the domain. An appropriate review would include checking the claimed entity, if one is identified through an independent channel, against the relevant corporate and regulatory registries; confirming contact channels through an offline or independently sourced route; and obtaining a security review before opening files or allowing the domain into an enterprise environment. Credentials, financial information, and other sensitive interactions should not be submitted.

EVIDENCE

- Browser testing completed 2 successful runs with 0 external XHR or fetch requests.
- Browser testing recorded 0 wallet-connect runs, 0 wallet-sensitive runs, and 0 hidden forms.
- The observed page exposed directory contents rather than a defined service or transaction process.

Summary Verdict

The overall posture is **critical trust risk**, driven by confirmed external malicious and blacklisting signals combined with an unverified operating identity and minimal site substance. The available evidence supports read-only observation only and does not support sensitive interaction, credential submission, or financial engagement.

Infrastructure Integrity

The domain resolves to one identified US hosting address operated by HVC-AS – HIVELOCITY, Inc., with no CDN or WAF detected and no separate edge-IP layer observed. This provides a clear hosting path for investigation, but the infrastructure offers no legitimacy assurance and should be treated only as a technical characteristic rather than a trust signal.

Closing Assessment

Enterprise users should block or quarantine the domain pending a documented security review and independent confirmation of its purpose and operator; no sensitive interaction should occur in the interim.

Written analysis generated 2026-08-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of packssrl.com.ar.

- The request stayed on packssrl.com.ar. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2021-12-20. CLEAR
- It is hosted on HVC-AS, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about packssrl.com.ar at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
