- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a Bangladesh-focused courier and e-commerce logistics service branded Steadfast Courier Ltd. It presents parcel delivery, pick-and-drop, warehousing, packaging, tracking, merchant onboarding, and cash-on-delivery collection, with revenue apparently derived from delivery charges, merchant services, and warehousing fees.

Scam/Impersonation Risk

No blacklist, phishing, malware, or brand-impersonation contradictions were observed. The homepage describes a conventional logistics model rather than an inherently abusive or high-risk service, and it includes operational features such as parcel tracking, merchant management, delivery coverage, and cash collection. The available evidence therefore supports an apparently legitimate, low-risk service site, while independently connecting the website to a real-world operator remains unresolved.

EVIDENCE

- Homepage: Presents Steadfast Courier Ltd as a courier and logistics provider with ecommerce delivery, pick-and-drop, packaging, warehousing, tracking, and cash-on-delivery services.
- Homepage behavior: No hidden forms, external password forms, wallet activity, cloaking, clipboard manipulation, or credential-harvesting indicators were detected.
- Domain registration: Registered 2016-04-20 (~10.32 years old) through GoDaddy.com, LLC.
- Web archive: 40 snapshots spanning 2013–2026, covering 14 years tracked.

Regulatory Verification Notes

The available page evidence identifies the business as Steadfast Courier Ltd and describes service coverage, pricing, contact details, and merchant onboarding. The site is also described as presenting licensing and membership claims, but the supplied evidence does not establish an independently verified license number or regulatory authorization. This is a verification matter rather than evidence of deception. The domain's registration history, clean external reputation, and stable transport security support the assessment that the site is established, although they do not independently prove the operator's legal identity.

EVIDENCE

- Homepage and navigation: Identify the service as Steadfast Courier Ltd and expose About Us, Contact, Pricing, Coverage, Track Parcel, Login, and Sign Up functions.
- Hosting infrastructure: Served from AS16509 (AMAZON-02 - Amazon.com, Inc., US).
- Site transport encryption: TLS certificate issued by Amazon RSA 2048 M01, validation level DV, valid to 2026-10-31T23:59:59+00:00.

What to Verify Next

Before entering into a merchant relationship or making a payment, independently confirm the contracting legal entity and any applicable courier-sector authorization through the relevant Bangladeshi registry or licensing authority. Confirm the official contact channels through an independently sourced business record, and review delivery liability, cash-settlement, refund, and dispute terms before relying on the service. Credential and payment interactions should use standard account-security and payment-protection controls.

EVIDENCE

- Homepage: Offers merchant onboarding and account functions, making confirmation of the contracting entity relevant before account or payment activity.
- Homepage: Describes cash-on-delivery collection, faster payment services, and merchant payment handling, making settlement and dispute terms material to engagement.
- Homepage: Claims nationwide coverage across eight divisions and 495 upazilas, which can be checked against the service area stated in the merchant agreement or published terms.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. The conclusion is strong at the website-risk level, but it should not be treated as independent proof of the real-world operator's identity.

Infrastructure Integrity

The site is protected by Amazon Web Services CDN/WAF infrastructure, with observed addresses functioning as CDN edge servers and no origin candidate identified in the supplied analysis. This is a mitigating infrastructure signal that reduces direct exposure of the origin environment, but it is not proof of business legitimacy.

EVIDENCE

- CDN/WAF: AWS protection was detected; 3 edge IPs were observed and 0 likely origin IPs were identified.
- Edge hosting: All observed edge addresses were associated with AS16509 and Amazon.com, Inc.
- Resolution: The site resolved successfully through the observed AWS edge infrastructure.

Closing Assessment

Routine browsing is proportionate to the assessed posture; before credential or payment interactions, ordinary independent checks of merchant identity, applicable service terms, and payment protections should be completed.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of packzy.com.

- The request stayed on packzy.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by awsdns-09.org, across 4 name servers. NOTED
- The registration is paid up to 2027-04-20. NOTED
- The earliest public archive of this site is from 2013-03-10. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about packzy.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
