

Is palmplaystore.com legit? TrustSniffer's high-trust assessment: 90/100

palmplaystore.com

Verdict

90
OUT OF 100

HIGH TRUST

palmplaystore.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 70%.

What this site appears to be	A Palm Store app catalog page listing apps across categories (games, social, tools) with an extensive consent management panel and many ad/analytics vendors. No login or financial transaction flows detected.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2014.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Palm Store is an app marketplace and catalog presenting mobile applications across games, social, communication, and utility categories, with an apparent business model based on app discovery, advertising, third-party integrations, and possibly promoted listings rather than financial services.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent app-catalogue purpose, with listings such as WhatsApp Messenger, TikTok, Shopee Indonesia, DANA Indonesia Digital Wallet, and Turbo VPN, and the available analysis found no phishing indicators, brand impersonation, malicious forms, wallet-connect activity, or financial transaction flow. The site's long operating continuity, strong traffic footprint, and clean external screening support an apparently legitimate, low-risk interpretation; these signals do not independently prove the real-world operator's identity.

EVIDENCE

- Domain registration: 2013-12-24 (~12.64 years old).
- Web archive: 195 snapshots spanning 2014–2026 (13 years tracked), with a maximum observed gap of 1 year.
- Homepage analysis: no login form, hidden form, sensitive form, wallet activity, or brand-impersonation indicator detected.
- External reputation checks: 0 malicious detections, 0 suspicious detections, and no confirmed blacklist or phishing result.

Regulatory Verification Notes

The available content describes an app marketplace, not a regulated financial service, and does not present a licence number or regulated-service registration claim. Its extensive consent-management panel and advertising or analytics integrations are consistent with the stated advertising-supported model, although the operator's real-world identity remains independently unverified. The absence of a broker match is a contextual reputational signal only and is not a licensing or regulatory determination.

EVIDENCE

- Domain registration: registrar recorded as Alibaba Cloud Computing Ltd. d/b/a HiChina (www.net.cn); expiration date 2026-12-24.
- Transport encryption: GeoTrust G2 TLS CN RSA4096 SHA256 2022 CA1; OV validation; valid to 2027-01-23.
- Certificate subject organization: 上海小传科技有限公司.
- Homepage content: one consent-management form and no detected sensitive transaction form.

What to Verify Next

Before credential or payment interactions, independently confirm the legal entity responsible for the service, review the applicable privacy and user terms, and establish that any application download is associated with the intended publisher and expected permissions. If the service later introduces paid listings, subscriptions, or other charges, confirm return or refund arrangements and retain payment-provider protections.

EVIDENCE

- Homepage: app marketplace/listing presentation with categories, top charts, and publisher-oriented app entries.
- Homepage: consent-management functionality and extensive third-party advertising or analytics integrations.
- Homepage: no login or financial transaction flow detected during analysis.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust and low-risk posture. The site has a coherent purpose and no observed scam, phishing, impersonation, or blacklist contradiction, while the operator's identity remains unverified rather than proven.

Infrastructure Integrity

The site resolves to AS45102, operated by ALIBABA-CN-NET / Alibaba (US) Technology Co., Ltd., with hosting identified in Singapore. No CDN or edge IPs were detected; three resolved addresses were classified as likely origin addresses. This is a direct-hosting posture and is neither proof of legitimacy nor, on the available evidence, a standalone adverse finding.

Closing Assessment

Ordinary use is proportionate to the assessed posture, with independent merchant-identity, policy, and payment-protection checks completed before credentials or payments are submitted.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of palmplaystore.com.

- The request stayed on palmplaystore.com. It was not redirected to another domain. CLEAR
- Registration is published under Alibaba Cloud Computing Ltd. d/b/a HiChina (www.net.cn). CLEAR
- DNS for this domain is served by awsdns-24.org, across 4 name servers. NOTED
- The registration is paid up to 2026-12-24. NOTED
- The earliest public archive of this site is from 2014-03-31. CLEAR
- It is hosted on ALIBABA-CN-NET, from a server in SG. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about palmplaystore.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent

with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
