Full analysis

Overview

The Pamba Heritage Villa is a hospitality website for a homestay in Alappuzha (Alleppey), Kerala, presenting accommodation, amenities, local activities, tariffs, testimonials, and contact information for direct room bookings and related services such as boat cruises, car rentals, Ayurvedic treatments, and activity arrangements.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, malicious-content, or identity-contradiction signals were observed. The site's content is consistent with a specific hospitality business rather than a credential-harvesting or deceptive financial-service operation: it describes a heritage villa, room accommodation, local activities, tariffs, terms, testimonials, and a TripAdvisor widget. The site has no login form, sensitive data form, wallet-connect function, hidden form, or suspicious script behavior. One abuse report associated with the hosting IP is explicitly attributed to shared data-centre infrastructure, carries zero confidence, and is therefore not evidence of abuse by this website.

EVIDENCE

- The homepage identifies “The Pamba Heritage Villa” as a homestay and describes a 110-year-old wooden mansion beside the Pamba River.
- The activities, tariff, and terms pages describe accommodation and paid hospitality services without identified phishing or impersonation indicators.
- Browser testing recorded no login form, hidden form, password-external form, wallet provider, clipboard hijack, or suspicious inline script.
- The domain was registered on 2005-06-01 and is approximately 21.24 years old; historical coverage spans 22 years.

Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate accommodation website, but the real-world operator identity is not independently verified. The site does not claim a financial, investment, or other regulated licence, and no licence number or licensing authority is presented in the reviewed material; for this hospitality model, that is a transparency and verification matter rather than evidence of a scam. The published terms, tariffs, contact information, location description, testimonials, and TripAdvisor integration provide substantive business context. Domain registration is through PDR Ltd. d/b/a PublicDomainRegistry.com, while the registration record identifies the organization as REDACTED FOR PRIVACY.

EVIDENCE

- The site's About, Contact, Tariff, and Terms pages provide property, booking, pricing, and service information.
- The registration record lists PDR Ltd. d/b/a PublicDomainRegistry.com as registrar and a creation date of 2005-06-01.
- The site's transport encryption uses a DV certificate issued by YR1, valid through 2026-10-16.
- The hosting record identifies AS146943, TIER4CLOU-AS - Tier 4 Cloud Services, IN, with the service resolved in India.

What to Verify Next

Before credential or payment interactions, an independent booking channel should confirm that the property, contact details, tariffs, cancellation terms, and payment recipient correspond to the same hospitality business. Any applicable local accommodation or tourism registration should be checked with the relevant Indian or Kerala authority, and payment protection should be confirmed before a material prepayment. Contact channels should also be confirmed through an independent, offline route where feasible.

EVIDENCE

- The Contact page supplies the channels and location details that can be cross-checked independently.
- The Tariff and Terms pages provide the booking conditions and cancellation basis for comparison with any payment request.
- The business description identifies room tariffs and ancillary service fees as the stated revenue model.
- The reviewed pages contain no sensitive submission form, so payment or credential collection should be assessed at the point of any external transaction.

Summary Verdict

The website has a **high-trust, low-risk posture** and the evidence is consistent with an established, apparently legitimate hospitality service. No contradictory signals were observed, although the operator's real-world identity remains independently unverified.

Infrastructure Integrity

The site resolves to a single likely origin IP on AS146943, operated by TIER4CLOU-AS - Tier 4 Cloud Services, IN, with no detected CDN or WAF layer. The transport layer provides a valid DV TLS certificate issued by YR1; this supports encrypted communication but does not independently establish the operator's identity.

Closing Assessment

Normal browsing and ordinary accommodation research are proportionate, while independent confirmation of the merchant identity, booking terms, and payment protections should precede credential submission or payment.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about pambaheritage.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
