

Is pamz3d.com a scam? TrustSniffer's high-risk assessment: 0/100

pamz3d.com

Verdict

0

OUT OF 100

CRITICAL RISK

pamz3d.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 75%.

What this site appears to be

Internal/embedded trading dashboard labelled 'FNO Algo Dashboard' showing market closed state, live P&L, trade entry/monitor controls, and server status. No forms, contact info, or monetization cues present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

https://pamz3d.com/

What pamz3d.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2011.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

pamz3d.com presents an "FNO Algo Dashboard," an internal-style trading interface for monitoring algorithmic positions, live and booked P&L, trade entry, manual exits, and server status; its apparent purpose is to support a software-based trading or operational workflow rather than direct public commerce.

Scam/Impersonation Risk

Confirmed external threat indicators create a critical risk to sensitive interaction. The domain is blacklisted by two external sources, with 11 malicious detections recorded in the evaluated reputation coverage, including a Tier-1 security-vendor detection. This is materially inconsistent with treating the site as a trusted trading service, even though the dashboard itself contains no login form, sensitive input form, overt payment mechanism, or page-level red flags. The available evidence does not establish a conflicting legal identity or a demonstrated brand impersonation; the decisive concern is the confirmed malicious-reputation signal. The dashboard's trade-entry controls, P&L monitoring, journal-writing functions, and references to offline entry and monitor servers nevertheless make it unsuitable for credentials, financial data, or other sensitive interaction.

EVIDENCE

- The homepage is titled “FNO Algo Dashboard” and displays trade entry, trade monitoring, live P&L, manual exit, journal, and server-status functions.
- External reputation telemetry records 11 malicious detections and a confirmed blacklist status from two sources.
- Domain registration evidence records creation on 2010-04-09 and an age of 16.38 years; the site’s historical record contains 381 snapshots spanning 2011–2026 across 16 tracked years.

Regulatory Verification Notes

The available page does not identify a legal operator, provide contact information, or state a licensing authority or license number. Because the visible service concerns algorithmic trading operations, the absence of an identifiable regulatory or corporate disclosure is a material verification gap rather than proof of unlawful conduct by itself. Independent identity verification remains unsuccessful, and no broker match was identified in the available third-party context; that result is contextual only and is not a licensing determination.

EVIDENCE

- The homepage contains no stated license authority or license number and provides no visible legal or contact disclosure.
- The site’s transport encryption uses a DV certificate issued by YR1, valid through 2026-09-30 12:30:08 UTC.
- The page presents an operational trading dashboard but no terms, risk disclosure, or regulatory-status statement.

What to Verify Next

Before any sensitive engagement, an organization should independently identify the operating entity through an established corporate record, confirm any claimed trading or financial authorization with the relevant regulator, and validate the service owner through a separately obtained contact channel rather than relying solely on information presented by the site. Any technical review should also confirm that the dashboard’s external communications are expected for the intended software architecture and that the service can be isolated from production credentials, payment instruments, and trading accounts.

EVIDENCE

- The homepage exposes operational controls but no public identity, legal, or contact pathway to support independent attribution.
- The observed dashboard is an internal-tool-style interface with no stated public commercial or regulatory framework.
- Behavioral testing recorded external requests and posts associated with the page, warranting architectural validation before integration into an enterprise environment.

Summary Verdict

The site has a critical sensitive-interaction risk posture and should not be treated as a trusted endpoint for authentication, credentials, financial information, or trading-related actions. Its apparent software-dashboard function does not offset the confirmed external malicious-reputation findings, and the real-world operator remains unverified.

Infrastructure Integrity

The site resolves directly to a likely origin address, with no CDN detected, and is hosted by GoDaddy.com, LLC in the United States on AS398101. This is ordinary hosting infrastructure rather than evidence of legitimacy; the valid DV TLS deployment provides transport protection only and does not mitigate the reputation-based risk.

EVIDENCE

- Hosting infrastructure: AS398101, GoDaddy.com, LLC, United States; one resolved likely origin IP, 107.180.112.161, with zero detected edge IPs.
- No CDN or WAF vendor was detected in the observed infrastructure.
- TLS certificate issuer: YR1; validation level: DV; validity end: 2026-09-30T12:30:08+00:00.

Closing Assessment

The appropriate enterprise disposition is to block or isolate the site from sensitive workflows and require documented independent validation before any business, technical, or financial integration is considered.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page made background requests to destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of pamz3d.com.

- The request stayed on pamz3d.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under GoDaddy.com, LLC. [CLEAR](#)
- DNS for this domain is served by domaincontrol.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2029-04-09. [CLEAR](#)
- The earliest public archive of this site is from 2011-02-03. [CLEAR](#)
- It is hosted on GO-DADDY-COM-LLC, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about pamz3d.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
