

Is pancakeswap.finance legit? TrustSniffer's high-trust assessment: 75/100

pancakeswap.finance

Verdict

75

OUT OF 100

HIGH TRUST

pancakeswap.finance appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-06-28 by automated analysis. Classification confidence 55%.

What this site appears to be

DEX landing page advertising token swaps, liquidity mining, staking pools, perpetuals and other DeFi features (mentions CAKE, BNB, APRs and bridges).

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

PancakeSwap is a decentralized, multichain exchange platform that presents token swaps, liquidity provision, staking, bridging, perpetual trading, prediction features, and related crypto services, with revenue associated with trading fees and token incentives.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, malicious-content, or conflicting-identity indicators were observed across the homepage, terms, documentation, and support pages. The site's stated functionality is consistent across those pages, although the terms page publishes the contact address `info@pancakeswap.com`, a contact-channel integrity anomaly that may affect deliverability. Overall, this is a legitimate established service with product-related financial risk rather than an impersonation concern.

- The homepage identifies PancakeSwap as a DEX offering swaps, liquidity, staking, bridging, perpetuals, prediction, and lottery features.
- The terms and documentation pages consistently identify PancakeSwap and describe wallet-connected protocol use.
- The terms page contains the contact-email anomaly noted above.
- Domain registration: 2020-09-12; approximately 5.89 years old; registrar: MarkMonitor Inc.

Regulatory Verification Notes

The terms page provides contractual disclosures, wallet-use conditions, token risks, and limitations concerning third-party bridges and wallets. No verified regulatory license or registration number is presented in the supplied site evidence, so regulatory status remains a transparency item rather than an indication of fraud. External reputation checks were clean, the site has high page authority, and its global traffic footprint is established.

- Hosted on AS13335, CLOUDFLARENET — Cloudflare, Inc., US.
- TLS certificate issued by WE1, validation level DV, valid to 2026-09-17.
- The terms page states that users accept the agreement by connecting a wallet and acknowledges risks from counterfeit tokens and third-party bridges.
- The site is registered through MarkMonitor Inc. and appears within the established global traffic population.

What to Verify Next

Before regulated or institutionally material use, confirm the applicable licensing and jurisdictional position through the relevant official registry, and confirm official support and contact channels through an independently

sourced route. Product-specific terms, token addresses, bridge arrangements, and yield conditions should be reviewed before funds are committed.

- The homepage advertises liquidity returns reaching 27.25% APR and perpetual leverage reaching 1001x.
- The terms page disclaims responsibility for third-party bridges, wallets, and falsely represented tokens.
- Documentation describes technical withdrawal procedures, including emergency withdrawal from staking contracts.
- The site’s business model includes trading fees, liquidity provision, staking pools, and token incentives.

Summary Verdict

PancakeSwap presents as a legitimate, established, high-trust website with no observed contradictions or abuse indicators. Normal interaction, including account login and standard platform use, is appropriate, subject to the financial and contractual risks inherent in decentralized-finance products.

Infrastructure Integrity

The website is protected by Cloudflare’s CDN and WAF, with observed traffic terminating on Cloudflare edge infrastructure rather than directly exposing an origin server. This provides a meaningful defensive control against common infrastructure-level abuse, but remains a mitigating security characteristic rather than proof of legitimacy.

Closing Assessment

Standard use is appropriate, while material transactions should follow the platform’s terms, product documentation, and applicable regulatory requirements.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	70/100
Identity verification confidence	72%

- org:Pancakeswap Finance
- contact:email
- on_site_identity

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of pancakeswap.finance.

- The request stayed on pancakeswap.finance. It was not redirected to another domain. CLEAR
- Registration is published under MarkMonitor Inc.. CLEAR

- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-09-12. NOTED
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about pancakeswap.finance at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
