## Key findings

---

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2009.
- No flags from the reputation services TrustSniffer consulted at assessment time.

## Full analysis

---

### Overview

A Japanese-language information portal, PAPIMO-NET presents searchable pachinko and pachislot machine listings, popularity and release information, participating-hall searches, FAQs, policies, contact resources, and account access. Its apparent business model is informational and industry-oriented; the reviewed content does not directly solicit wagers or deposits.

### Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or confirmed malicious reputation signals were observed. The site's long operating history, consistent subject matter, meaningful traffic footprint, and clean external reputation converge strongly in support of an established, legitimate service rather than a recently created or repurposed operation.

- The homepage consistently identifies the service as PAPIMO-NET and attributes the site to GLORY NASCA Ltd.
- Historical records contain 215 archive snapshots spanning 2009–2026, representing 18 years of tracked history, with no suspicious repurposing or semantic drift detected.
- The domain was registered in 2013 and is approximately 13.47 years old; its registration extends to 2027-02-28.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no phishing finding, no external blacklist finding, and an established global traffic rank of 65,578.

### Regulatory Verification Notes

The reviewed site functions as an informational directory for gambling-related entertainment rather than an online wagering or deposit-taking platform. Its footer provides terms of use, a privacy policy, information about external transmission of user data, contact resources, and a disclaimer that published figures derive from the site's independent research and are not associated with manufacturers or halls. No licensing claim, regulator, or licence number was presented in the supplied content; because no regulated transaction service was observed, the evidence does not establish that such authorization is applicable. No matching broker record was identified in the supplied third-party context, which is not a legal or regulatory determination.

- The homepage offers machine-name and installation-hall searches and states that its numerical data are independently researched.
- The homepage links to terms of use, a privacy policy, external-data-transmission information, FAQs, and contact information.
- The reviewed page contained no direct mechanism for placing wagers or making deposits.

- The site's transport encryption uses a DV certificate issued by Amazon RSA 2048 M01, valid until 2027-02-01.

**What to Verify Next**

For institutional onboarding, the contracting party should be matched to GLORY NASCA Ltd. using authoritative corporate records, and the applicable terms and privacy provisions should be reviewed against the intended account use. Any commercial relationship should also confirm whether the service merely supplies information or introduces functions subject to gambling, advertising, or consumer-protection requirements in the relevant jurisdiction.

- Corporate attribution appears in the homepage copyright notice.
- Account login is offered through the site's navigation, making the terms and privacy provisions relevant to account governance.
- The homepage includes categories associated with pachinko, pachislot, casino games, poker, and gambling entertainment.
- The site provides dedicated FAQ and inquiry routes for operational clarification.

**Summary Verdict**

The website is a legitimate, established, and trustworthy information service. Its coherent identity, durable provenance, clean threat reputation, and mature site content support normal interaction, including account login and standard use, with high confidence.

**Infrastructure Integrity**

The site is served through Amazon infrastructure on AS16509 (Amazon.com, Inc., United States) and uses AWS CDN/WAF protection. Both observed addresses—13.193.23.33 and 54.248.150.176—were edge servers, while the origin remained shielded; this reduces direct infrastructure exposure but is a security-control indicator rather than independent proof of legitimacy.

**Closing Assessment**

Prospective users may proceed with normal use, while institutions considering a contractual or commercially material engagement should complete their standard counterparty and jurisdictional due-diligence process.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

**What the analysis found**

No rule findings contributed to this verdict.

**Identity verification**

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 50%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

## What TrustSniffer observed

First-party facts recorded during the assessment of papimo.jp.

- The request stayed on papimo.jp. It was not redirected to another domain. CLEAR
- DNS for this domain is served by co.uk, across 4 name servers. NOTED
- The registration is paid up to 2027-02-28. NOTED
- The earliest public archive of this site is from 2009-02-13. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about papimo.jp at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
