

Is par30s.ir a scam? TrustSniffer's high-risk assessment: 0/100

par30s.ir

Verdict

0

OUT OF 100

CRITICAL RISK

par30s.ir shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Persian e-commerce storefront named 'فروشگاه اینترنتی پارسیس' offering laptops, phones, accessories, product listings with prices, contact info and a physical address in Qom. Contains account/login and shopping cart UI elements.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://www.par30s.ir/>

What par30s.ir served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2010.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a Persian-language online retail storefront presenting electronics merchandise, customer-contact information, account access, shopping-cart functionality, and an installment-calculation service. Its apparent business model is direct-to-consumer sale of consumer technology and related support services under the name “فروشگاه اینترنتی پارسیس”.

Scam/Impersonation Risk

The site presents a coherent retail storefront rather than an obvious investment or cryptocurrency scheme, and the page-level review found no explicit phishing, brand-impersonation, or investment-fraud content. However, this benign presentation is outweighed by material external contradictions: ten malicious detections were recorded, Fortinet and Sophos identified the site or associated resource as threatening, and the domain was listed by external blacklist sources. These signals support a **critical sensitive-interaction risk** despite the storefront’s functional appearance. The domain’s apparent age does not resolve the current threat-reputation

conflict. No identity contradiction between multiple legal entities was observed, but the real-world operator remains unverified. Evidence:

- The homepage is an electronics storefront titled “فروشگاه اینترنتی پارسیس,” with product listings, prices, customer contact information, and a Qom physical address.
- External reputation assessment recorded 10 malicious detections and Tier-1 threat detections from Fortinet and Sophos.
- The domain was identified by external blacklist sources; no malicious result was recorded by Google Safe Browsing.
- Domain registration continuity indicates registration in 2009 and an age of approximately 16.44 years.

Regulatory Verification Notes

The available legal and identity disclosure is unclear, and the operator is not independently connected to a verified real-world entity. The site does not disclose a license or registration number in the supplied content; this is a regulatory-transparency gap rather than, by itself, proof of fraud. Because the business offers retail sales and an installment calculator, any relevant commercial, consumer-credit, payment, or e-commerce authorization should be confirmed with the applicable Iranian authority before financial engagement. The absence of a matching broker record is only contextual and does not establish regulatory standing. Evidence:

- The homepage identifies the business by its Persian storefront name and provides a Qom address, but the supplied pages do not provide a legal entity name, license authority, or license number.
- The homepage includes account registration/login and checkout/cart forms, creating a sensitive interaction surface.
- The site is hosted on AS208161, Pars Shabakeh Azarakhsh LLC, IR.
- The transport certificate is DV, issued by YR1, and valid until 2026-10-19.

What to Verify Next

Before any purchase, account creation, credential submission, or financial transaction, an independent party should confirm the operator's legal registration and any authorization applicable to installment or payment services through the relevant official registry. The stated physical address and contact channels should be validated through an offline or independently sourced route, and payment should be limited to a method offering strong dispute and chargeback protection. Until those checks are completed, interaction should remain limited to non-sensitive, read-only browsing. Evidence:

- The homepage presents a physical address in Qom and multiple social/contact channels that require independent confirmation.
- The storefront provides account, login, and checkout functionality.
- The available identity-verification status is unverified, so the on-site business name cannot be treated as proof of the operator's legal identity.

Summary Verdict

The overall posture is **critical and unsuitable for sensitive interaction**. The site's ordinary e-commerce presentation does not overcome the confirmed external threat and blacklist contradictions, while the operator's identity remains unverified.

Infrastructure Integrity

The site resolves directly to a single likely origin address without a detected CDN or WAF layer. It is hosted by Pars Shabakeh Azarakhsh LLC in Iran on AS208161; the absence of an edge-protection layer provides no meaningful infrastructure-based mitigation to the external reputation findings.

Closing Assessment

Enterprise users should not permit credentials, payment details, or other sensitive data to be submitted until independent legal, contact, and payment-protection checks have been completed; any engagement should otherwise remain non-sensitive and read-only.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of par30s.ir.

- The request stayed on par30s.ir. It was not redirected to another domain. [CLEAR](#)

- Registration is published under IRNIC. CLEAR
- DNS for this domain is served by parsvds.com, across 2 name servers. NOTED
- The earliest public archive of this site is from 2010-03-12. CLEAR
- It is hosted on parsvds, from a server in IR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about par30s.ir at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
