

Is patrionza.com safe? TrustSniffer's low-trust assessment: 40/100

patrionza.com

Verdict

40
OUT OF 100

LOW TRUST

patrionza.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

A minimal 'Launching Soon' landing page for patrionza.com that offers an email signup and contact form, mentions Airo AI Builder and uses Google reCAPTCHA. No product details, pricing, or claims of financial returns are present.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://patrionza.com/>

What patrionza.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2019.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

patrionza.com is a minimal “Launching Soon” landing page for a prospective product or service, presenting an email-list signup, a contact form, and a reference to Airo AI Builder while offering no product details, pricing, or financial-return claims.

Scam/Impersonation Risk

The site has a **material reputation contradiction**: external intelligence records a confirmed blacklist presence and multiple malicious detections. This is sufficient to make sensitive interaction inappropriate pending independent resolution, even though the page itself contains no login form, hidden form, wallet connection, or explicit financial solicitation, and no direct on-page brand-impersonation signal was identified. Abuse reports associated with an Amazon CDN address are attributed to shared infrastructure, so they are a contextual signal rather than proof that the reports concern this site specifically; the confirmed blacklist and malicious detections remain the decisive concerns.

EVIDENCE

- External reputation assessment: confirmed blacklist status and 2 malicious classifications.
- The homepage presents a coming-soon page with an email signup and contact form, but no login form, password field, wallet connection, or financial-return claim.
- Registered 2019 (7.57 years old); historical capture record contains 27 snapshots spanning 2019–2025 (7 years tracked).
- The observed Amazon CDN address had 13 abuse reports with attribution recorded as shared infrastructure.

Regulatory Verification Notes

The present site is too limited to establish the operator's legal identity or regulatory standing. Its homepage provides a copyright notice and links associated with privacy and terms, but does not identify a clearly responsible legal entity, state a regulatory authorization, or provide a license number; this is a transparency and verification gap rather than, by itself, proof of fraud. The site's stated use of Airo AI Builder and its audience-building model do not establish whether any future service will require authorization. No matching third-party broker profile was identified, which provides no affirmative regulatory endorsement.

EVIDENCE

- The homepage is titled "patrionza.com" and contains "Launching Soon," "Contact Us," and an email-list signup, with no displayed license authority or license number.
- Hosted on AS16509 (AMAZON-02 – Amazon.com, Inc., US).
- TLS certificate: GoDaddy TLS Intermediate CA DV - R1v1, DV validation, valid to 2026-09-27.
- The site's transport encryption is present and issued by a known certificate authority.

What to Verify Next

Before any sensitive interaction, the prospective operator should be independently connected to a legal entity through authoritative corporate records and any authorization required for the eventual service should be confirmed with the relevant regulator. The form's data destination, privacy terms, retention practices, and future service terms should also be reviewed before submitting contact information, with official contact channels confirmed through an independent route.

EVIDENCE

- The homepage currently collects email addresses and contact messages before the underlying offering is disclosed.
- The page uses Google reCAPTCHA and states that cookies are used for traffic analysis and experience optimization.
- Browser observation recorded 120 external XHR requests, including 111 non-whitelisted requests, and 10 console errors across 2 successful runs.

Summary Verdict

The overall posture is **low trust with sensitive-interaction risk**. The site has a benign, limited public presentation, but the confirmed external reputation contradiction and the absence of independently verified operator identity prevent a positive legitimacy conclusion.

Infrastructure Integrity

The website is served through Amazon infrastructure and protected by a CDN/WAF arrangement; observed addresses are CDN edge servers, with no origin server candidate identified. This reduces direct origin exposure and is a mitigating technical control, but it does not offset the site's external reputation concerns.

Closing Assessment

Until the operator and any future service are independently validated, interaction should remain limited to passive viewing; credentials, personal information, and financial activity should not be submitted.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC
- The page made background requests to destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH

Signals weighed against the site

- AbuseIPDB: 13 reports on hosting IP 76.223.105.230 (Amazon.com, Inc., Content Delivery Network), 26% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of [patrionza.com](#).

- The request stayed on [patrionza.com](#). It was not redirected to another domain. [CLEAR](#)
- Registration is published under [GoDaddy.com, LLC](#). [CLEAR](#)
- DNS for this domain is served by [domaincontrol.com](#), across 2 name servers. [NOTED](#)
- The registration is paid up to 2027-01-26. [NOTED](#)
- The earliest public archive of this site is from 2019-05-06. [CLEAR](#)
- It is hosted on [AMAZON-02](#), from a server in [US](#). [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [patrionza.com](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
