- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Payless Colombia is a Spanish-language ecommerce storefront offering footwear, accessories, gift cards, promotions, delivery, customer accounts, and customer support for women, men, and children, with revenue generated through direct retail purchases and promotional sales.

Scam/Impersonation Risk

No contradictions were observed. The storefront presents a coherent ordinary-retail model, with product catalogues, Colombian-peso pricing, delivery and returns information, account functionality, newsletter signup, and Colombian business contact details. External reputation checks found no malicious or suspicious detections, no phishing or brand-impersonation indicators, and no confirmed blacklist finding. The domain also has an established registration history and documented historical presence consistent with a genuine operating site.

- The homepage presents footwear, accessories, promotions, gift cards, delivery information, and account functions for a Colombian consumer audience.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist or phishing finding.
- The domain was registered on 2011-09-22 and is approximately 14.87 years old; archival records contain 10 snapshots spanning 2013–2018 across 6 tracked years.

Regulatory Verification Notes

The legal and policy content supports a functioning retail operation, including delivery, returns, customer-service information, and Colombian company contact details. No financial-services license or registration number is claimed, which is a transparency item relevant to regulatory verification but is not evidence of deception for this retail business model. No matching third-party broker warning was identified.

- The site provides delivery, returns, policy, and customer-service pages alongside Colombian company contact details.
- The storefront is categorized as ecommerce, with an established-business assessment and no page-level red flags.
- TLS is valid and issued at domain-validation level by YR1 through 2026-09-07.

What to Verify Next

For a prospective purchaser, confirm that checkout, delivery, returns, and customer-service terms match the intended transaction, and independently confirm any corporate or consumer-protection details required for procurement or higher-value orders.

- The site exposes delivery information, policies, product pricing, and customer-service channels for direct review.
- The account and newsletter forms are present without an untrusted submission destination or hidden form detected.
- The site’s observed behavior completed successfully in two runs, with no cloaking, wallet-drainer, clipboard-hijacking, or suspicious-script indicators.

Summary Verdict

The site presents a high-trust posture consistent with an established and legitimate consumer-retail business. Its identity, content, operating model, historical footprint, and external reputation converge without contradictory signals. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

Hosting resolves to one likely origin address without a detected CDN or WAF layer. The site is hosted by PRIVATESYSTEMS – PrivateSystems Networks in the United States on AS63410; this is a neutral deployment characteristic and does not undermine the otherwise strong assessment.

Closing Assessment

Standard purchasing, account, and support interactions are appropriate, subject to ordinary transaction checks proportionate to the value of the purchase.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about paylesscolombia.co at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
