

Is paylocity.com legit? TrustSniffer's high-trust assessment: 90/100

paylocity.com

Verdict

90

OUT OF 100

HIGH TRUST

paylocity.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-10 by automated analysis. Classification confidence 75%.

What this site appears to be

Marketing and product pages for Paylocity, an HR/payroll/finance/IT SaaS platform. The site provides product overviews, resources, case studies, and multiple contact/demo request forms aimed at prospective enterprise customers.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2008.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

Paylocity is a corporate B2B SaaS website presenting an integrated platform for human resources, payroll, finance spend management, and IT and asset management, with product information, resources, case studies, sales contacts, and requests for demonstrations aimed at prospective business customers.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent enterprise-software business model, with product, resource, case-study, contact, and demonstration-request content consistent with a commercial HR and payroll provider; no phishing, brand-impersonation, malicious-content, or suspicious on-page pattern was identified. A single low-confidence abuse report concerns a Microsoft shared hosting IP rather than the website specifically, so it is a limited infrastructure-level reputational signal and does not establish site-level abuse.

EVIDENCE

- The homepage and product pages describe HR, payroll, finance, and IT software and contain no reported fraud indicators.
- The contact and request-a-demo pages provide three business-oriented forms, with no sensitive form or untrusted submission destination identified.
- The site's transport endpoint is associated with 1 abuse report, confidence score 5, for shared Microsoft hosting IP 20.119.0.30; the attribution is to shared infrastructure rather than the site.

Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate enterprise software website, but the real-world operator identity is not independently verified. The site operates as a SaaS provider selling subscriptions, services, and support rather than presenting a regulated financial product; nevertheless, the supplied content does not state a regulatory license, licensing authority, or registration number. This is a disclosure and verification gap, not evidence of impersonation or fraud. The domain is registered through GoDaddy.com, LLC, and the site uses a valid Domain Validation certificate issued by Sectigo, supporting ordinary technical continuity but not independently proving the operating entity.

EVIDENCE

- Domain registration: created 2005-11-21T16:33:49Z, age 20.73 years, registered through GoDaddy.com, LLC, expiring 2027-09-01T03:59:59Z.
- Web history: 2,517 archive snapshots from 2008-03-25T06:23:36Z through 2026-07-31T13:10:26Z, spanning 19 tracked years with a maximum gap of 1 year.
- Hosting resolution identifies AS8075, Microsoft Corporation, US.
- TLS: Sectigo Public Server Authentication CA DV R36, Domain Validation, valid to 2026-12-09T23:59:59+00:00.

What to Verify Next

Before a credential or payment interaction, an enterprise customer should independently confirm the contracting entity named in the commercial agreement, review applicable subscription, privacy, security, and service terms, and confirm any claimed corporate or regulatory status through the relevant official registry. Contact details should be validated through an independently sourced corporate channel, and payment arrangements should use standard contractual controls and payment protection appropriate to the transaction.

EVIDENCE

- The site's product, resources, case-study, contact, and request-a-demo paths provide the materials to compare against the proposed commercial engagement.
- The available site analysis identifies no regulatory license claim, license authority, or license number for independent confirmation.
- The legal and commercial terms should be checked against the entity identified in any quotation, order form, or subscription contract.

Summary Verdict

The overall posture is **high trust and low risk**, with converging evidence of an established and apparently legitimate enterprise website and no observed scam or impersonation contradiction. Confidence in the trust classification is strong, while confidence that the site has been independently connected to a specific real-world operator remains qualified rather than proven.

Infrastructure Integrity

The site is protected by Akamai CDN/WAF infrastructure, with all observed addresses functioning as CDN edge servers and no origin candidate identified in the analysis. The resolved hosting organization is Microsoft Corporation in the United States; this layered delivery model is a mitigating security and availability signal, but infrastructure protection alone is not proof of legitimacy.

Closing Assessment

The site is suitable for ordinary business evaluation, subject to routine independent confirmation of the contracting entity, commercial terms, and payment protections before credentials or funds are committed.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 1 report on hosting IP 20.119.0.30 (Microsoft Corporation, Data Center/Web Hosting/Transit), 5% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	39%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of paylocity.com.

- The request stayed on paylocity.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by nsone.net, across 9 name servers. NOTED
- The registration is paid up to 2027-09-01. NOTED
- The earliest public archive of this site is from 2008-03-25. CLEAR
- It is hosted on MICROSOFT-CORP-MSN-AS-BLOCK, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about paylocity.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
