Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2001.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the public-service portal of the Conseil régional des Pays de la Loire, presenting regional government information and services covering grants, transport, education, employment, culture, environmental programs, news, events, and institutional affairs. Its apparent model is publicly funded administration rather than commercial transactions or investment activity.

Scam/Impersonation Risk

No contradictions were observed. The homepage has a coherent regional-government identity, substantive public-service content, no login or sensitive submission form, no phishing or brand-impersonation indicators, and no malicious or suspicious reputation findings. Its long-running, continuous web presence materially supports identity continuity rather than opportunistic impersonation.

EVIDENCE

- Domain registered 15 March 2001 and approximately 25.39 years old.
- 2,212 archive snapshots spanning 2001–2026, covering 26 tracked years.
- Homepage content identifies the Conseil régional des Pays de la Loire and provides region-specific public services, grants, transport, education, and institutional information.

Regulatory Verification Notes

The site operates as a regional public-service portal, not as a financial or investment provider. The supplied content contains no licensing claim or registration number; this is a limited disclosure point for any service that might create a regulated relationship, not evidence of deception. The registered domain uses DIGITAL RURAL INFORMATIQUE, and no adverse broker-identity match was identified.

EVIDENCE

- Hosted on AS13335 (Cloudflare, Inc.; CLOUDFLARENET).
- TLS certificate issued by WE1, with DV validation, valid to 2026-10-25.
- The homepage presents public administration, grants, transport, training, employment, culture, and institutional resources.
- External reputation checks recorded zero malicious and zero suspicious detections.

What to Verify Next

For any matter requiring formal regulatory treatment, confirm the responsible public authority and applicable registry through an independent official channel. For account-related activity, use contact details and service links reached from the established regional portal rather than relying on unsolicited messages.

EVIDENCE

- The homepage provides dedicated pathways for individuals, businesses, associations, and local authorities.
- The site publishes institutional, procurement, employment, transport, and public-service navigation areas suitable for independent cross-checking.

Summary Verdict

The website presents a legitimate, established, and trustworthy public institution with a coherent identity and no observed contradiction or abuse pattern. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

Cloudflare CDN/WAF protection fronts the site, with all four observed addresses belonging to CDN edge infrastructure and no origin candidate identified. This reduces direct origin exposure and is a mitigating infrastructure characteristic, although it is not independently proof of institutional legitimacy.

Closing Assessment

Normal browsing, login, and standard account actions are appropriate within the site’s intended public-service context.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=5

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about paysdelaloire.fr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
