

Is pazfl.com safe? TrustSniffer's low-trust assessment: 40/100

pazfl.com

Verdict

40

OUT OF 100

LOW TRUST

pazfl.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Spanish-language portfolio site for artist Paz Flores featuring biography, exhibitions, and artwork categories. No forms or financial solicitations visible.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://www.pazfl.com/>

What pazfl.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2018.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website is a Spanish-language personal portfolio for artist Paz Flores, presenting an artist biography, exhibition information, and categorized artwork through a simple gallery-style interface; its apparent purpose is to promote the artist's work, commissions, and exhibition activity.

Scam/Impersonation Risk

The site's visible content is consistent with an informational artist portfolio and does not present login forms, financial solicitations, investment claims, or direct payment mechanisms. However, this benign page presentation conflicts with external security findings recording malicious detections and a confirmed blacklist status. No brand impersonation or phishing mechanism was observed on the captured page, but the confirmed external warnings create a material risk for sensitive interaction and prevent the site from being treated as trustworthy for credentials, payments, or other consequential activity.

EVIDENCE

- The homepage presents artist and exhibition content, with no forms, credential fields, wallet connection, or financial solicitation.
- External reputation checks recorded 4 malicious detections and confirmed blacklist status in two external sources.
- Domain registration evidence: created 2015-07-27T16:37:42Z, registered through 10DENCEHISPAHARD, S.L, and aged 11.07 years.
- Archival records span 2018-08-04 to 2025-02-15, representing 8 years tracked, with sparse historical coverage.

Regulatory Verification Notes

The available material identifies an individual artist and describes cultural and artistic activity rather than a regulated financial service. No licensing or regulated-service claim is presented in the captured content; this is therefore a disclosure point to resolve only if the site is used for artwork sales, commissions, or another transaction. The apparent identity connection is plausible but not independently verified, and the external blacklist findings remain a reputational concern rather than a licensing determination. The site's transport security supports encrypted delivery but does not establish operator legitimacy.

EVIDENCE

- The Info content identifies Paz Flores as a psychiatrist by training and painter by vocation, and describes artistic education and exhibitions.
- The captured page contains no license number, regulatory registration, or regulated-financial-service disclosure.
- TLS uses issuer YE1 with DV validation and is valid to 2026-10-17T10:52:27+00:00.
- Site behavior recorded 2 successful runs, 0 external XHR requests, 0 external POST requests, and 0 hidden forms.

What to Verify Next

Before any purchase, commission, or exchange of personal information, independently confirm that the person or organization receiving payment is connected to the artist through an offline or independently sourced channel. Where a transaction involves a business or regulated intermediary, confirm the relevant legal entity and any applicable registration directly with the competent registry. Contact details and social-profile ownership should also be confirmed through an independently obtained route rather than relying solely on the website.

EVIDENCE

- The homepage links to Facebook and Instagram profiles as the site's visible external social channels.
- The site uses WordPress and presents a generic page title without structured identity metadata.
- No payment form or sensitive-data form was observed during the captured interaction.
- The hosting infrastructure resolves through AS16276 operated by OVH - OVH SAS, FR.

Summary Verdict

The overall posture is **low trust with elevated sensitive-interaction risk**. The site's apparent artistic purpose and technically benign captured behavior do not overcome the confirmed external security warnings. Identity remains only likely rather than independently established, so the website should not be regarded as a reliable basis for consequential engagement.

Infrastructure Integrity

The website is protected by CDN/WAF infrastructure, with observed edge addresses associated with AS16276 and OVH - OVH SAS, FR; the origin server was not observable in this analysis. This provides a mitigating layer against direct origin exposure, but infrastructure protection cannot offset the external reputation risk.

Closing Assessment

Restrict activity to passive review unless independent identity and transaction checks are completed; credentials, personal information, and financial transactions should not be submitted while the external warnings remain unresolved.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

- 01 Governance Risk

 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	38%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of pazfl.com.

- The request stayed on pazfl.com. It was not redirected to another domain. CLEAR
- Registration is published under 10DENCEHISPAHARD, S.L. CLEAR
- DNS for this domain is served by cdmon.net, across 5 name servers. NOTED
- The registration is paid up to 2027-07-27. NOTED
- The earliest public archive of this site is from 2018-08-04. CLEAR
- It is hosted on OVH, from a server in FR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about pazfl.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
